

Nigeria Labour Force Survey Annual Report 2023

TABLE OF CONTENTS

Table of Contents.....	ii
List of Figures.....	iii
List of Tables.....	iv
Key Highlights of the Report.....	x
1 Introduction.....	1
1.1 Background.....	1
1.2 Main Changes in the Definition and Concepts.....	2
1.3 Important Note.....	3
2 New Survey Approach and Methodology.....	5
2.1 Survey Design, Scope, and Coverage.....	5
2.2 Key Definitions and Concepts.....	9
3 Findings of the Survey.....	12
3.1 Working Age Population.....	12
3.2 Labour Force Participation Rate.....	13
3.2.1 Labour Force Participation Rate by State.....	14
3.3 Employment to Population Ratio.....	16
3.3.1 Employment to Population Ratio by State.....	17
3.4 Status in Employment.....	19
3.4.1 Sector of Employment for Employees at Main Job.....	22
3.5 Branch of Economic Activity at Main Job.....	23
3.6 Employed Persons by Occupation.....	26
3.7 Unemployment Rate.....	27
3.7.1 Unemployment Rate by State.....	29
3.8 Time-related Underemployment Rate.....	32
3.8.1 Time-related Underemployment Rate by State.....	33
3.8.2 Distribution of Working Hours.....	34
3.9 Discouraged Job Seekers.....	35
3.9.1 Discouraged Job Seekers by State.....	36
3.10 Labour Underutilisation.....	37
3.10.1 Labour Underutilization by State.....	38
3.11 Informal Employment.....	40
3.12 Not in Education, Employment or Training (NEET)	42
3.12.1 NEET by State.....	42
4 APPENDIX.....	44
4.1 Annex 1: Tables of State Estimates.....	44
4.2 Annex 2: Questionnaire.....	267

NPC	National Population Commission
PPS	Probability Proportional to Size
PSUs	Primary Sampling Units
SEPSAM	Systematic Equal-Probability Sampling
SNA	System of National Accounts
SRS	Simple Random Sampling

KEY HIGHLIGHTS OF THE REPORT

This report provides annual estimates for the year 2023 at both the national and state level.

- ✓ The Nigerian working-age population was 116,604,860 representing 53.8% of the total population.
- ✓ The labour force participation rate was 76.3%. Bauchi state recorded the highest rate at 92.3% while Ekiti had the lowest at 63.4%.
- ✓ The employed population was 84,148,566 out of the total working-age population. Out of this number, a total of 20,645,254 persons were aged between 15-24 years.
- ✓ The national employment-to-population ratio (EPR) was 72.2%. Sex classification shows male ratio was 73.7% and 70.7% for females. Bauchi state had the highest EPR of 88.4% while Rivers had the lowest with 55.7%.
- ✓ The proportion of persons outside the labour force was 23.6% of the total working-age population.
- ✓ The headline unemployment rate was 5.4% for the period under review. Disaggregating further by state, Abia recorded the highest rate with 18.7% while the lowest was Nasarawa with 0.5%.
- ✓ Time-related underemployment was 11.1% at the national level. The state with the highest time-related underemployment was Plateau state with 33.9%, while Nasarawa state recorded the lowest with 0.3%.
- ✓ The combined rate of time-related underemployment and unemployment as the share of the labour force (LU2) was 15.9%.
- ✓ The percentage of employees entitled to either pension or health insurance schemes in Nigeria was 26.3%. Zamfara state had the highest (65.9%) while Abia had the lowest, 3.9% among wage employed.
- ✓ 77,561,393 individuals engaged in informal employment, accounted for 92.2% of the employed population. Kano (5,197,699) and Lagos states (4,633,957) had the highest number of people in informal employment (excluding agriculture)

- ✓ The youth NEET rate was 15.6%. Abia had the highest NEET rate at 38.1% followed by Rivers state at 36%. Zamfara state had the lowest rate at 4.5%.

State	Unemployment Rate	Unemployed Population	LU2	LU3	LU4	Wage Employment	Self-Employment	Informal Employment	NEET (15-24Years)

LU1: Unemployment rate = $100 \times \frac{\text{persons in unemployment}}{\text{Labour force}}$

LU2: Combined rate of time-related underemployment and unemployment

= $100 \times \frac{\text{persons in time-related underemployment} + \text{persons in unemployment}}{\text{Labour force}}$

LU3: Combined rate of unemployment and potential labour force

= $100 \times \frac{\text{persons in unemployment} + \text{potential labour force}}{\text{Extended labour force}}$

LU4: Composite measure of labour underutilisation

= $100 \times (\text{persons in time-related underemployment} + \text{persons in unemployment} + \text{potential labour force}) / \text{extended labour force}$

1. INTRODUCTION

1.1 BACKGROUND

Labour force statistics provide information about the size and composition of the workforce of a country, including employment, unemployment, and participation rates. These statistics are essential for understanding the health of the economy, analysing trends in employment, and making informed policy decisions on job creation initiatives. Governments, businesses, and researchers often use them to assess the labour market and develop strategies for workforce development.

In Nigeria, just like any other country, the Labour force statistics are produced and disseminated by the National Statistics Office, National Bureau of Statistics (NBS), which has the statutory mandate to be the authoritative source of all official statistics in Nigeria. The statistics are produced through a nationwide household-based survey called the Nigerian Labour Force Survey conducted and reported every quarter using guidelines set by the International Labour Organisation (ILO).

Over the years, the labour force survey in NBS has been conducted quarterly using a national and state-level representative sample of approximately 33,000 households. While the methodology deployed in the conduct of the survey has always followed the internationally set standards, the definitions and concepts used to determine who is employed or under-employed were slightly modified to suit national objectives.

In 2013, however, following the conclusion of the 5-yearly International Conference of Labour Statisticians, ICLS, new resolutions were reached on certain definitions and concepts used in the computation of labour force statistics. The main objectives of these new resolutions were to address limitations in the unemployment statistics by providing broader measures of labour underutilisation. It also recognises all forms of work, both paid and unpaid, and integrates labour statistics with other topics, such as national accounts amongst others.

Following the publication of the Q4 2020 labour force survey report, which produced headline unemployment and underemployment rates of 33.3% and 22.8%, NBS as part of its routine methodology review and enhancement processes, commenced work in 2021 with the World Bank and the International Labour Organisation (ILO) to update the methodology and process for conducting the NLFS in Nigeria. The review and methodology update in line with the 2013 ICLS resolutions have culminated in the publication of new labour force estimates

which are now internationally comparable and provide more detailed and precise information on the labour market in Nigeria.

Since the fourth quarter of 2022, the NBS has been producing new labour force statistics using the revised methodology. This new model is designed to report quarterly estimates at the national level and state-disaggregated estimates annually. Accordingly, this report presents the state-level findings for the year 2023, following 12 months of data collection from the fourth quarter of 2022 to the third quarter of 2023 - specifically, October 2022 to November 2023.

1.2 MAJOR CHANGES IN DEFINITIONS AND CONCEPTS

NBS has significantly enhanced the methodology it uses to collect labour market data through the NLFS. This is in terms of the concepts and definitions used, as well as in the actual conduct of the NLFS survey. This has been done following International Labour Organisation (ILO) guidelines in the 19th (International Conference of Labour Statisticians) ICLS Resolutions to bring the NLFS methodology in line with best international practice. In terms of the definitions, below are the most significant changes in the definition made under the recent revision –

- I. **Working Age Population** – previously was persons aged 15 -64 but is now persons aged 15 and above.
- II. **Labour Force** – previously those between the ages of 15 – 64, that were willing and available for work, which includes those employed and those unemployed. However, it is now those aged 15 and above who are willing and available for work, including those employed and those unemployed.
- III. **Unemployed Persons** – the new definition of unemployed persons, is anyone within the Labour force, who within the reference period, (previous 7 days) did nothing or worked for less than 1 hour. This is a significant change from the old definition, where to qualify to be employed, a person needed to have worked for a minimum of 20 hours within the reference period of 7 days.
- IV. **Underemployed Persons** – Under the old definition, a person is considered Underemployed if he or she worked between 20 and 39 hours within the reference period of a week. Under the new definition, however, anyone working under 40 hours, which is 1 – 39 hours a week, and is willing to accept more hours of work is considered Underemployed.

Beside from the changes to these definitions and concepts, significant enhancements have also been made to the conduct of the NLFS survey, which include:

- I. Basing the questionnaire on a standard ILO template to allow for international comparisons but adapting it carefully for the Nigerian context.
- II. Enhanced Sample selection process based on newly carved out digital enumeration areas by the National Population Commission, and the use of a more robust and manageable sample size with quarterly listing of households to reduce attrition.
- III. Giving field teams sufficient time – including the weekend – in each enumeration area to reach sampled respondents without relying on proxy responses.

1.3 IMPORTANT NOTE

A rise in the unemployment rate is not entirely equivalent to an increase in job losses or vice versa. Rather, an increase in unemployment can occur because of several reasons, of which loss of an existing job is just one. A rise in unemployment generally means the number of people searching for jobs has increased, which can occur because:

- a. people previously outside the labour force (e.g. students, housewives, etc) have decided to join the labour force and are now in search of jobs; or
- b. People previously working have lost their jobs and are now in search of jobs.

However, it is often a combination of these two factors. As mentioned in statements a and b, an increase in the labour force size can lead to a decrease in the unemployment rate. What drives an increase in the labour force? The labour force does not change simply from job losses, since those people previously had jobs and were already in the labour market, which does not change because of them losing their jobs. Rather, what causes an expansion in the size of the labour force is the increase in the number of persons within the working-age population, who were previously not willing or able to work, but who are now available and actively looking for work.

The 1 hour per week benchmark for determining whether a person is employed or not, does not suggest that working an hour a week is sufficient to cater for the person's needs. It is only used as a benchmark. Furthermore, labour force statistics deal with whether persons are engaged or not in any activity for pay or profit, and the nature of that engagement. The living standards or welfare of a

person are captured by different indicators such as poverty and other welfare statistics.

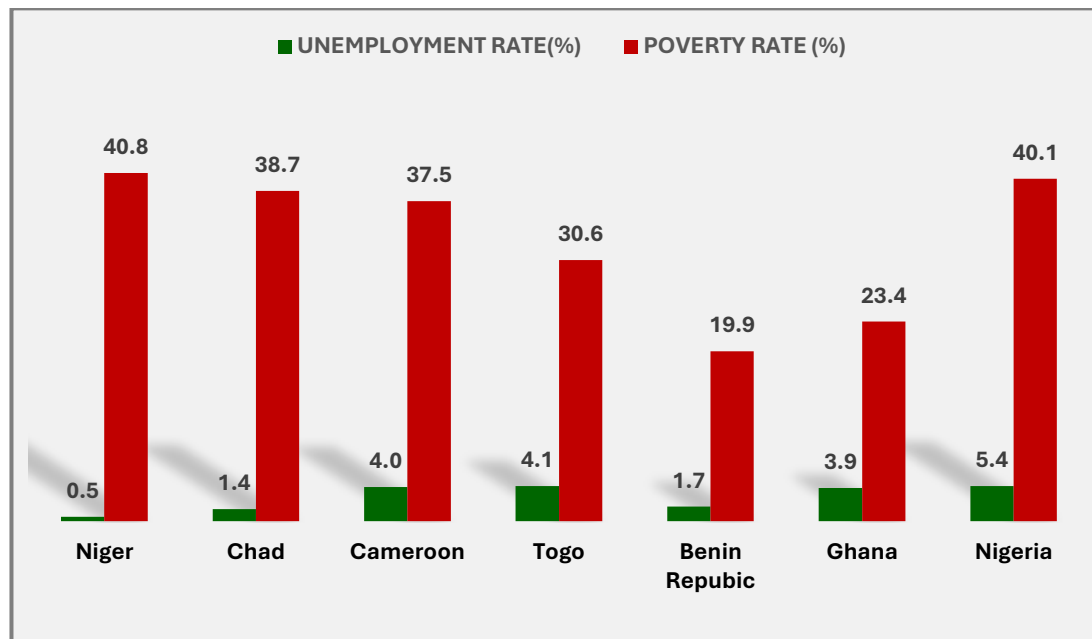

Figure 1: Neighbouring Countries Recent Unemployment and Poverty
Source: World Bank Blog, 2023

It is also possible for persons to be employed and yet live under the poverty line. This phenomenon termed Working Poor is very common across low-income and lower-middle-income countries. Examining the poverty and unemployment rates (using the ILO method) of Nigeria and its neighbours shows a very similar pattern, low unemployment rate and relatively high poverty rate.

2. NEW SURVEY APPROACH AND METHODOLOGY

2.1 SURVEY DESIGN, SCOPE, AND COVERAGE

As a norm for all household-based surveys in NBS, the approach adopted in collecting the required information for this survey was the Computer Assisted Personnel interviewing (CAPI) approach. Data was collected in all 36 states of the Federation and Federal Capital Territory (FCT). Enumeration Areas (EAs) in both urban and rural areas were canvassed for the exercise. As indicated in the introduction of this report, the methodology for the conduct of this survey has been revised following the ILO guidelines. In this revision, three changes in the labour force survey methodology deserve specific attention.

First, the questionnaire has been brought in line with international best practices. The new questionnaire for the NLFS follows the ILO template but has been adapted carefully for the Nigerian context. This means that employment, including temporary absences, subsistence agriculture, job characteristics, underemployment, and unemployment can be more precisely captured. The labour market statistics in Nigeria will now be suitable for international comparisons, which provides additional guidance to policymakers.

Second, data collection has been switched to a continuous approach. Previous labour force surveys in Nigeria had aimed to conduct four separate surveys for the entire year to provide quarterly and state-level estimates.

A sample of 33,300 households was used each quarter in previous labour force surveys. However, the sample size has now been adjusted to 35,520 households for the entire year, spread across 12 months. Although this sample size is smaller than before, it will still allow for national-level estimates on a quarterly basis and state-level estimates annually. The survey is being conducted with smaller, more manageable field teams, making monitoring easier. The table below shows the distribution of Enumeration Areas (EAs) and households across the states.

Table 2: States' Sample Distribution

State	NO OF EAs PER QUARTER	NO_HHs/EA	NO OF EAs ANNUAL	NO_HHs/ QUARTER	NO_HHs ANNUAL

YOBE	24	10	96	240	960
ZAMFARA	24	10	96	240	960
Total	888		3,552	8,880	35,520

Combined with constant fieldwork monitoring by NBS headquarters staff, this new approach makes it possible to identify and fix any data issues in real-time and improve fieldwork and data quality as the survey progresses. This continuous

measurement approach for labour force surveys is implemented in most developed countries (ILO, 2018). It also provides the bedrock for a labour force survey methodology that is sustainable and can be continued for years and decades to come.

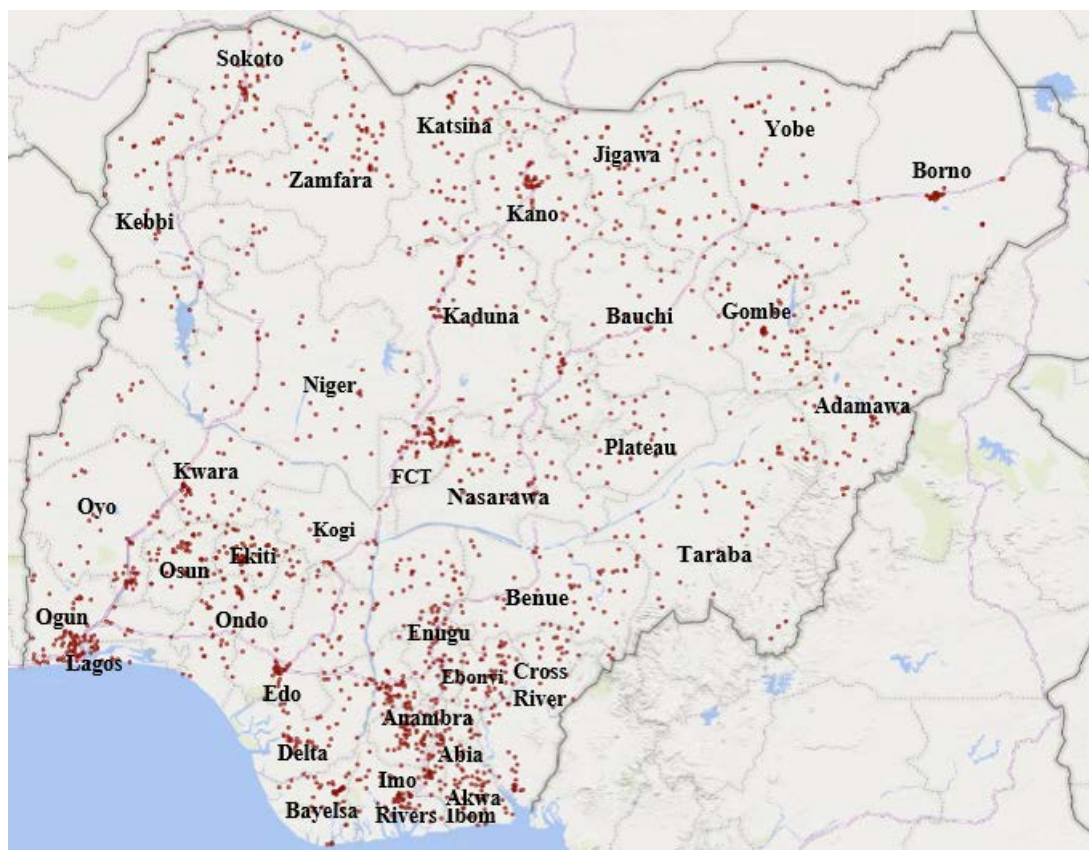

Figure 2: Geo-Location of EAs Covered

Third, in previous labour force surveys, the fieldwork for each quarter lasted between 17 – 21 days. As a result, enumerators spent only about two days in each enumeration area before moving on. Those days could fall on either weekdays or weekends, making it difficult to wait for respondents to adjust their schedules. Currently, each team spends one week in each enumeration area, conducting interviews from Wednesday to Sunday. This allows enumerators enough time to speak directly with the actual respondents, including those who work during the week and are only available for interviews on the weekends. It was adopted to ensure interviews can be conducted directly with respondents working regularly from Monday to Friday, who might be absent from their homes during the working days of the week. This, in turn, limits the extent of proxy responses: where household members can answer on other household members' behalf. Proxy response can reduce data quality because household members may not have sufficient knowledge of what others in their household are doing regarding work.

Table 3: Basic differences between the Old and New Methods

Item	Old Methodology	New Methodology
Working Age Population	Persons aged 15 – 64 years.	Persons aged 15 years and above.
Employment	All those of the working-age population who were engaged in any activity that produced goods or provided services for a minimum of 20 hours in the reference period.	All those of working age population who during the reference period were engaged in any activity to produce goods or provide services for pay or profit for at least 1 hour.
Labour Force	Working Age Population (15 – 64 years) that are employed and unemployed.	Working Age Population (15 years and above) that are employed and unemployed.
Unemployed	Worked below 20 hours or did not work but searching and available in the reference week.	Not in employment, actively searching and available (did nothing for pay or profit).
Time-related Underemployed	Worked between 20 and 39 hours a week.	Worked less than 40 hours a week but was willing and available for more hours of work.
Questionnaire	13th ICLS model questionnaire.	19th ICLS model questionnaire.
Periodicity	Cross-sectional (One-off data collection).	Continuous – throughout the year (Longitudinal).
Sample Size (national)	33,300 Households Quarterly.	35,520 Households spread across 12 months.
Sample Size (State)	900 Households Quarterly.	960 Households spread across 12 months.
Data Collection	17 – 21 days every quarter.	Weekly (Wednesday – Sunday) Continuously for 12 months.
Employment in Agriculture	Recorded as employed if the 20 hourly threshold is met.	A distinction is made between commercial and subsistence agriculture.
Reporting	Quarterly National and state-level estimates.	Quarterly National and yearly state levels estimate.

All these changes lead to improvements in how the survey is conducted and make it impossible to a direct comparison of these new results with the old series. Hence, it is completely incorrect to say that the unemployment rate has fallen using these new figures compared to the old figures, or vice versa.

2.2 KEY DEFINITIONS AND CONCEPTS

Table 4 provides a list of definitions of some of the key labour market concepts used in this report.

Table 4: List of key labour market definitions

Key term	Definition
Active search	Taking specific actions to search for paid work or to start a business during the past four weeks.
Available to work	Being available to start work (or additional work) either last week or in the next two weeks.
Employed, at work	Individuals who are working for pay or profit and who worked for at least one hour in the last seven days.
Employed, temporarily absent	Individuals who typically work for pay or profit but were temporarily absent from work during the past seven days (due to working time arrangements, such as “flexiwork”, or temporary absences, such as sick leave, vacation, or parental leave).
Employment-to-population ratio	The proportion of the working-age population that is employed.
Out of the labour force	Those who are not in the labour force. This group is sometimes described as “economically inactive”.
Labour force	The combination of the employed and unemployed population.
Labour force participation rate	The proportion of the working-age population that is in the labour force.
Pay or profit	Pay or profit refers to any type of remuneration that is: <ul style="list-style-type: none"> • In cash or in kind (including wages or salaries for time worked or profits from the sale or barter of goods). • Already paid or expected to be paid (payable remuneration).

	<ul style="list-style-type: none"> • Paid directly to the person performing the work or indirectly to/through a household member.
Potential labour force	Those who are outside the labour force but who are either actively searching for paid work but not available or available but not actively searching.
Primary job	The job that an individual spends the most time doing.
Proxy response	A response made on behalf of a target respondent by another member of the household at the time of the interview.
Subsistence agriculture	Subsistence agriculture workers are those farmers who grow food crops or rear livestock solely to meet the needs of themselves and their households. Their produce is (mostly) not sold at the market to generate income or profit. This is sometimes referred to as own-use production work.
Time-related Underemployed	Those employed individuals working one hour or more but less than 40 hours per week who are willing to work more hours and who are available to do so.
Time-related Underemployment rate	The proportion of employed individuals that is time-related underemployed.
Unemployed	Those individuals who are not employed and who are engaged in active search and are available to start a job.
Unemployment rate	The proportion of the labour force that is unemployed.
Working age	Individuals aged 15 years or more.

Figure 3 provides an overview of the structure of the labour market according to the definitions outlined above.

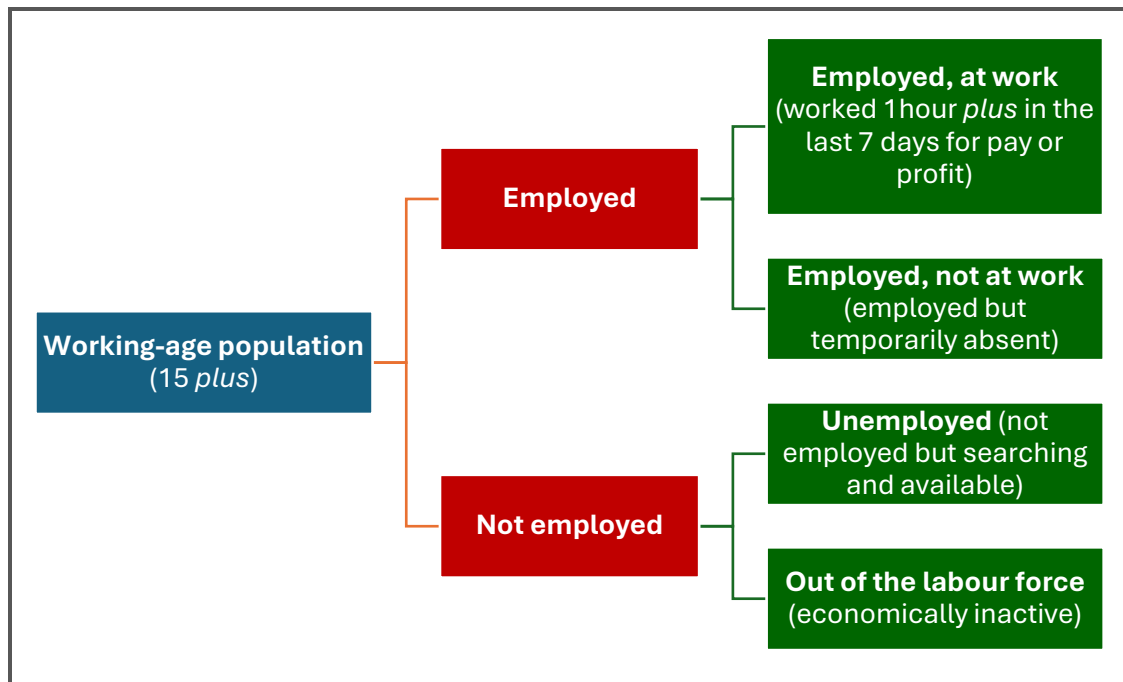

Figure 3: Structure of the labour market

The unemployment rate, therefore, is a percentage function of those within the labour force (those employed and unemployed) that meet the specific criteria in the revised definition, while the underemployment rate is a percentage of employed persons working under 40 hours who express willingness and availability to work more hours.

Unemployment rate =

$$\frac{\text{Number of Unemployed (those who did not work for at least 1 hour in the last 7 days, but are available and searching)}}{\text{labour Force (those aged 15 and above, who are working or available and searching)}} \times 100$$

It is important to also note that, unlike in previous rounds, the analysis for those engaged in subsistence agriculture is done separately from the labour force, hence under this new method, those in subsistence agriculture cannot be said to be employed or unemployed, as they are analysed separately from the labour force.

3. FINDINGS OF THE SURVEY

3.1 WORKING AGE POPULATION

The working-age population is a central concept in labour statistics. This indicator measures the share of the working-age population to the total population. The working age population refers to all persons aged 15 years and above who are in the labour force and outside the labour force. The survey results revealed that the Nigeria working age population in 2023 was 116,604,860 representing 53.8% of the total population.

Table 5: Working Age Population by State and Sex

ZAMFARA	2,719,242	1,311,119	1,408,123

The proportion of females in the working-age population was 52% which was higher than males at 48%. The chart depicts the share of male and female in the working-age population.

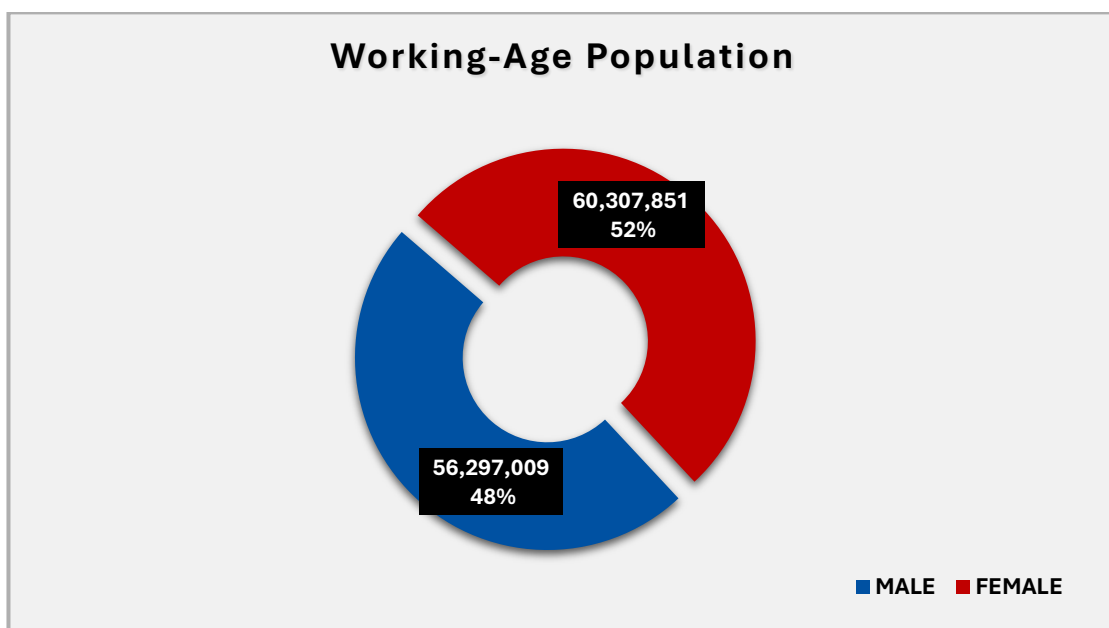

Figure 4: Working Age Population by Sex

3.2 LABOUR FORCE PARTICIPATION RATE

This indicator is a measure of the proportion of a country's working-age population that engages actively in the labour market, either by working or looking for work. It indicates the size of the supply of labour available to engage in the production of goods and services relative to the working-age population. It is defined as the ratio of the labour force to the working-age population expressed in percentage terms.

In the period under review, the Labour Force Participation Rate was 76.3% or 88,940,861 in absolute value, nationally. Of this figure, 43,564,586 or 77.4% were males, while 45,376,276 or 75.2% were females. In terms of educational level, persons with postgraduate qualifications recorded the highest rate with 90.8%,

followed by those with post-secondary qualifications with 87.9%, while the lowest were those with primary education with 65.6%. The table below shows the labour force participation rate by various categories.

Table 6: Population in the Labour Force, Employed and Unemployed

Demographics	Labour force	%	Employed	%	Unemployed	%
National	88,940,861	76.3	84,148,566	72.2	4,792,296	5.4
Sex						
Male	43,564,586	77.4	41,501,884	73.7	2,062,701	4.7
Female	45,376,276	75.2	42,646,681	70.7	2,729,595	6.0
Education Level						
No Education	24,279,680	81.6	23,511,595	79	768,085	3.2
Primary	23,108,732	65.6	22,163,220	62.9	945,512	4.1
Secondary	29,204,642	77.7	27,254,686	72.5	1,949,956	6.7
Post Secondary	11,741,788	87.9	10,636,221	79.6	1,105,567	9.4
Postgraduate	606,020	90.8	582,844	87.3	23,176	3.8
Age-Group						
15-24	22,728,403	54.4	20,645,254	90.8	2,083,149	10.1
25-34	19,970,571	87.0	18,496,513	92.6	1,474,058	8.0
35-44	20,393,759	93.9	19,719,557	96.7	674,202	3.4
45-54	14,594,352	94.0	14,281,468	97.9	312,884	2.2
55-64	7,204,922	89.2	7,055,846	97.9	149,076	2.1
65+	4,048,854	61.5	3,949,928	97.6	98,926	2.5
Place of Residence						
Urban	51,341,385	73.7	47,851,992	68.7	3,489,393	6.8
Rural	37,599,476	80.1	36,296,573	77.3	1,302,903	3.5

3.2.1 LABOUR FORCE PARTICIPATION RATE BY STATE

Disaggregating further by state indicates that 18 states recorded labour force participation rates above the national estimate of 76.3%. Bauchi state was the highest with 92.3%, followed by Kebbi state (88.8%) and Niger state (85.8%). Ekiti state recorded the lowest with 63.4%, closely followed by Ebonyi state (63.5%).

LABOUR FORCE PARTICIPATION RATE BY STATE

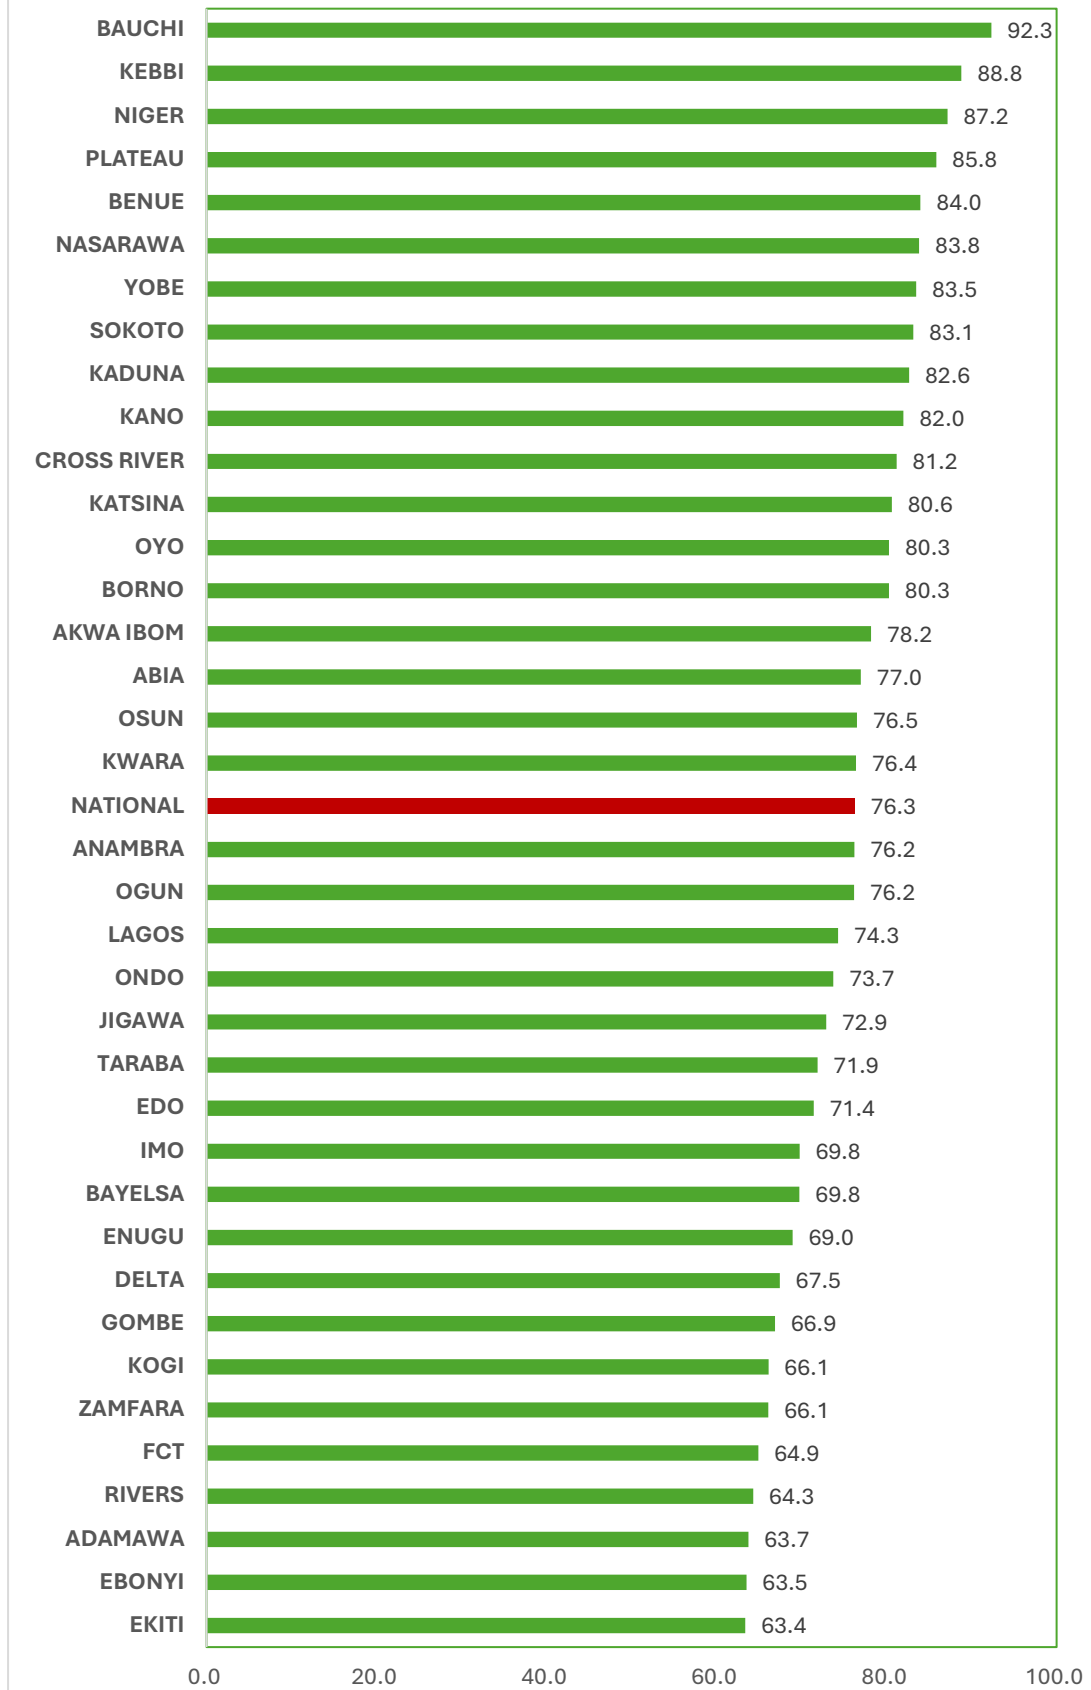

Figure 5: Labour Force Participation Rate by State (%)

3.3 EMPLOYMENT TO POPULATION RATIO

The employment-to-population ratio measures the number of workers currently employed against the total working-age population.

Table 7: Employment to Population Ratio

Demographics	Employed Population	Ratio
Sex		
Male	41,501,884	73.7
Female	42,646,681	70.7
Education Level		
No Education	23,511,595	79.0
Primary	22,163,220	62.9
Secondary	27,254,686	72.5
Post Secondary	10,636,221	79.6
Postgraduate	582,844	87.3
Age-Group		
15-24	20,645,254	49.4
25-34	18,496,513	80.6
35-44	19,719,557	90.8
45-54	14,281,468	92.0
55-64	7,055,846	87.4
65+	3,949,928	60.0
Place of Residence		
Urban	47,851,992	68.7
Rural	36,296,573	77.3

Nationally, 72.2% of the working-age population were in employment. Reporting by place of residence, the employment-to-population ratio was 68.7% in urban areas and 77.3% in rural areas. The employment-to-population ratio by sex was 73.7% among males and 70.7% among females.

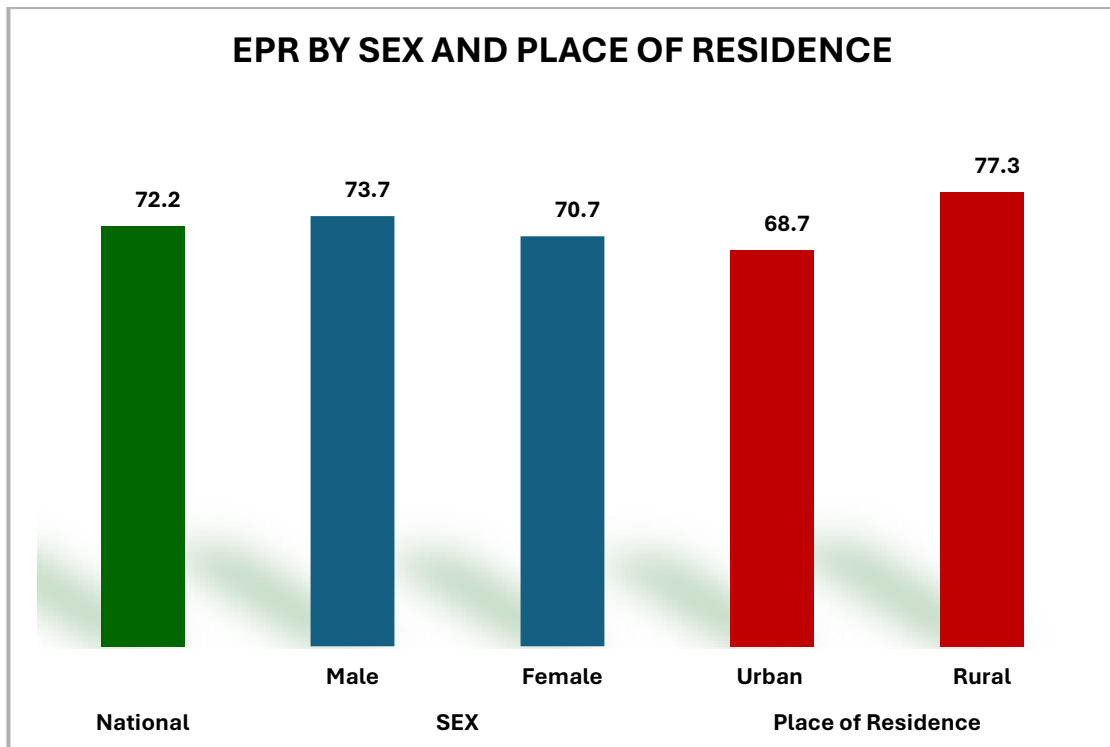

Figure 6: Employment to Population Ratio (EPR)

3.3.1 EMPLOYMENT TO POPULATION RATIO BY STATE

Reporting by state-level disaggregation, the results showed that Bauchi state had the highest EPR of 88.4% followed by Kebbi with 87.3%, and Niger state with 84.4%. states with the lowest employment-to-population ratio were Rivers with 55.7% followed closely by the FCT with 55.8%, and Gombe state with 59.4%. The chart below shows the Employment-to-population rate by state level.

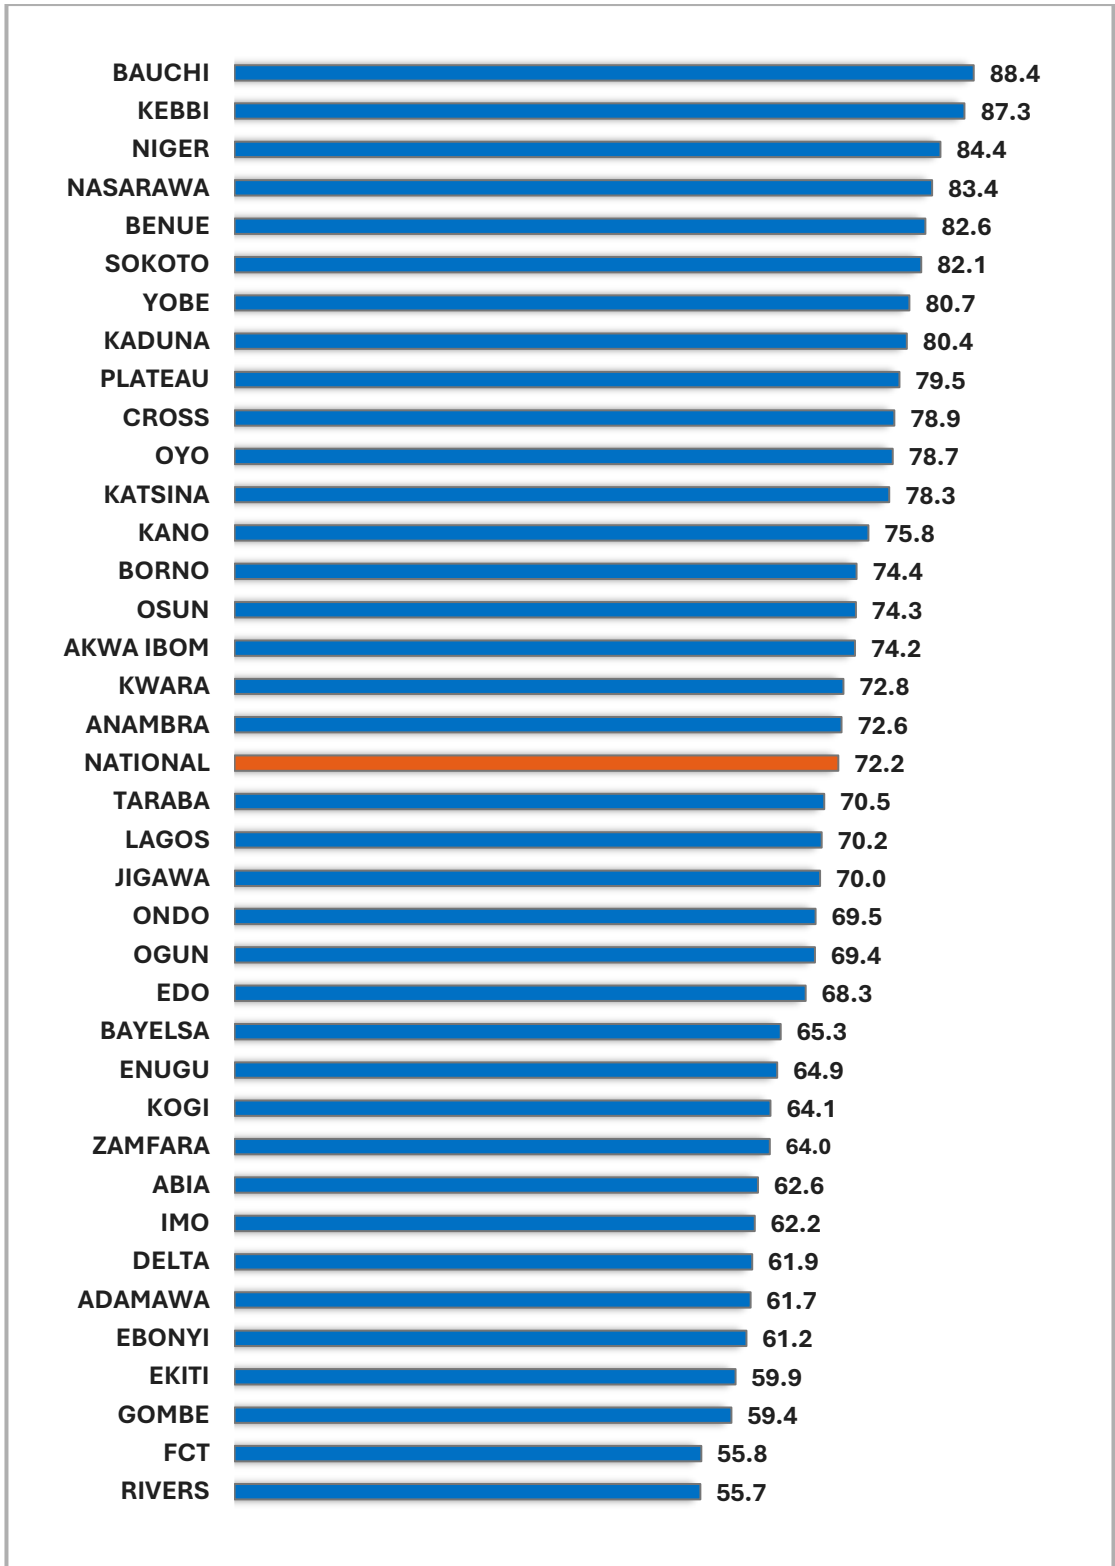

Figure 7: Employment to Population Ratio by State (%)

3.4 STATUS IN EMPLOYMENT

Going by the definition of employment, any person who engages in an activity for pay or profit during the reference period is said to be in employment. By this, those in self-employment as well as those working as employees or for wage are said to be employed. During the reference period, 2023, 85% of persons employed were in self-employment, while the remaining 15% were engaged as employees or wage earners.

Disaggregating by sex, the proportion of females engaged in self-employment was 87.8% which was higher than the proportion of males which was 81.3%. Males had a higher share of employees with 18.7% than the females who had 12.2%.

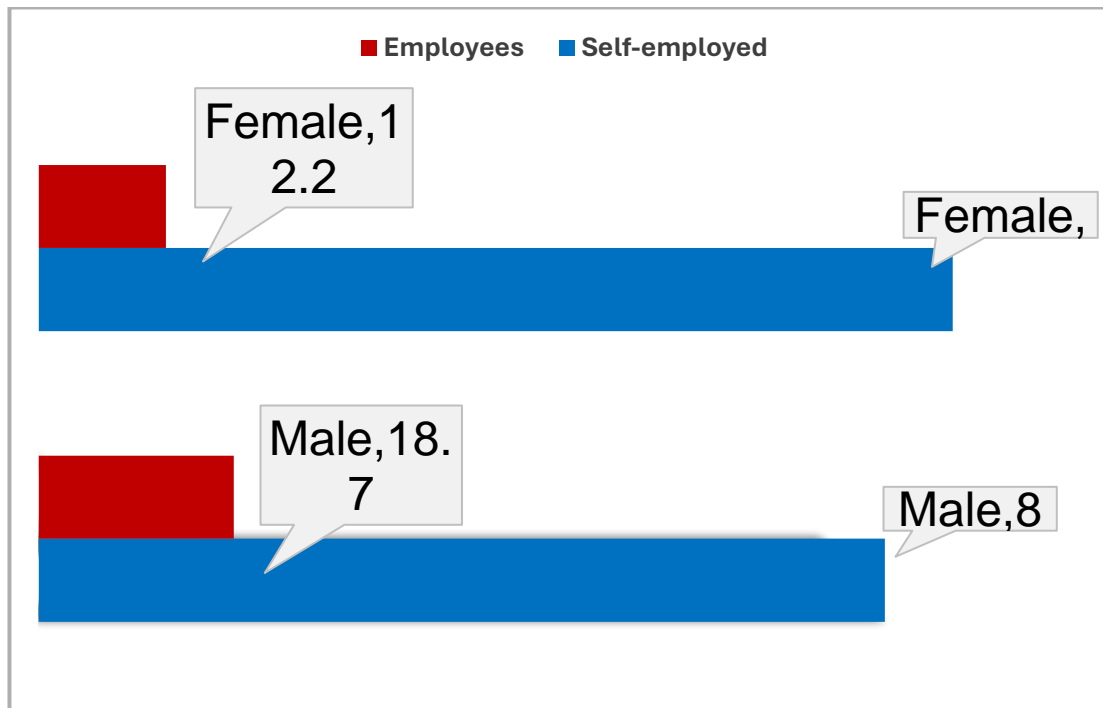

Figure 7: Status in Employment by Sex (%)

Further disaggregation by states, Bauchi (88.4%), Kebbi (87.3%) and Benue (82.6%) states recorded the highest proportion of employed population, while FCT (55.8%), Gombe (59.4%) and Ekiti (59.9%) states were the states with least proportion of employed population. Additionally, states proportional records of employed population in the last one year were further classified into self-employed and employees as presented in table 8.

Table 8: Status in Employment by Sex

State	Employed Population			Self-Employed			Employees		
	Total	Sex		Total	Sex		Total	Sex	
		Male	Female		Male	Female		Male	Female

3.4.1 SECTOR OF EMPLOYMENT FOR EMPLOYEES AT MAIN JOB

The survey collected information on the sector of employment for the main job of the employees, that is either employed in the public or private sector. Nationally, 74.4% of employees or wage earners worked in the private sector, while 25.6% of the wage earners worked in the public sector. By state, the results indicate that Lagos and Borno states recorded the highest proportion of employees working in the private sector, while Zamfara and Jigawa states recorded the highest proportion of employees working in the public sector.

Table 9: Employees by Sector of Main Job

Sector	Private			Public		
	Total	Male	Female	Total	Male	Female

3.5 BRANCH OF ECONOMIC ACTIVITY AT MAIN JOB

This section provides an overview of employment distribution across various industries as classified by the International Standard Industrial Classification (ISIC). National figures show that 25,341,219 individuals were engaged in Agriculture, forestry, and fishing, this figure represents 30.1% of total employed persons. The estimated number of persons employed in wholesale and retail trade was 23,133,193 representing 27.5% of all persons in employment. Professional, scientific, and technical activities engaged 509,861 individuals representing 0.6% while electricity, gas, steam, and air conditioning supply engaged 51,383 (0.1%) of total employed persons.

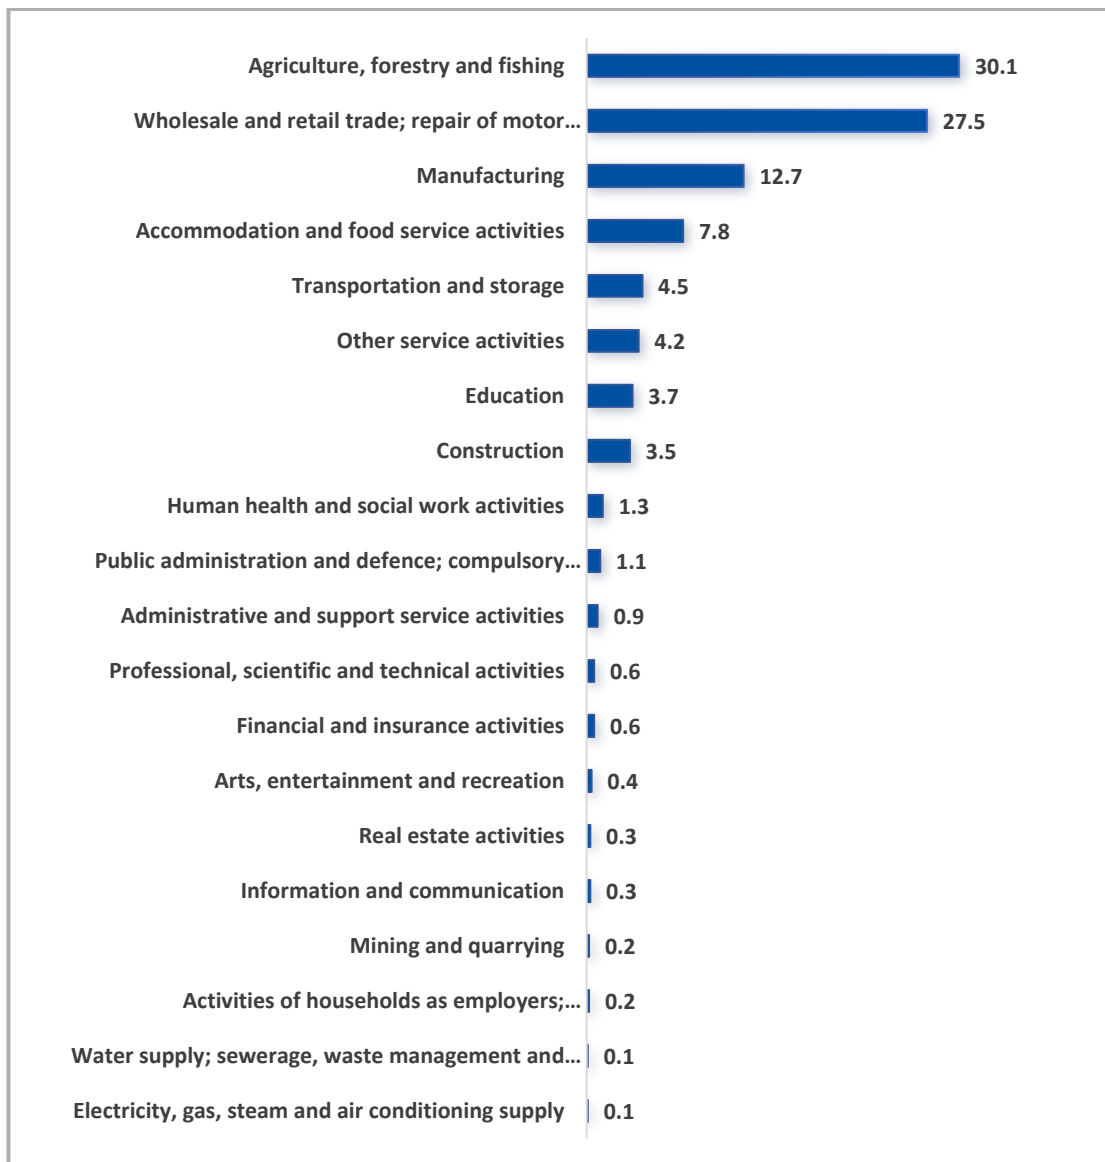

Figure 9: Employment by Economic Sector of Main Job (%)

Disaggregation by sex shows that 63.8% of people engaged in agricultural activities are male while 36.2% are female. The transportation and storage sector was highly dominated by males with 98.7% while female was 1.3%. The same pattern is also reflected in the construction sector with 97.9% male and 2.1% female. Wholesale and retail trade had more females with 67.5% and males 32.5%.

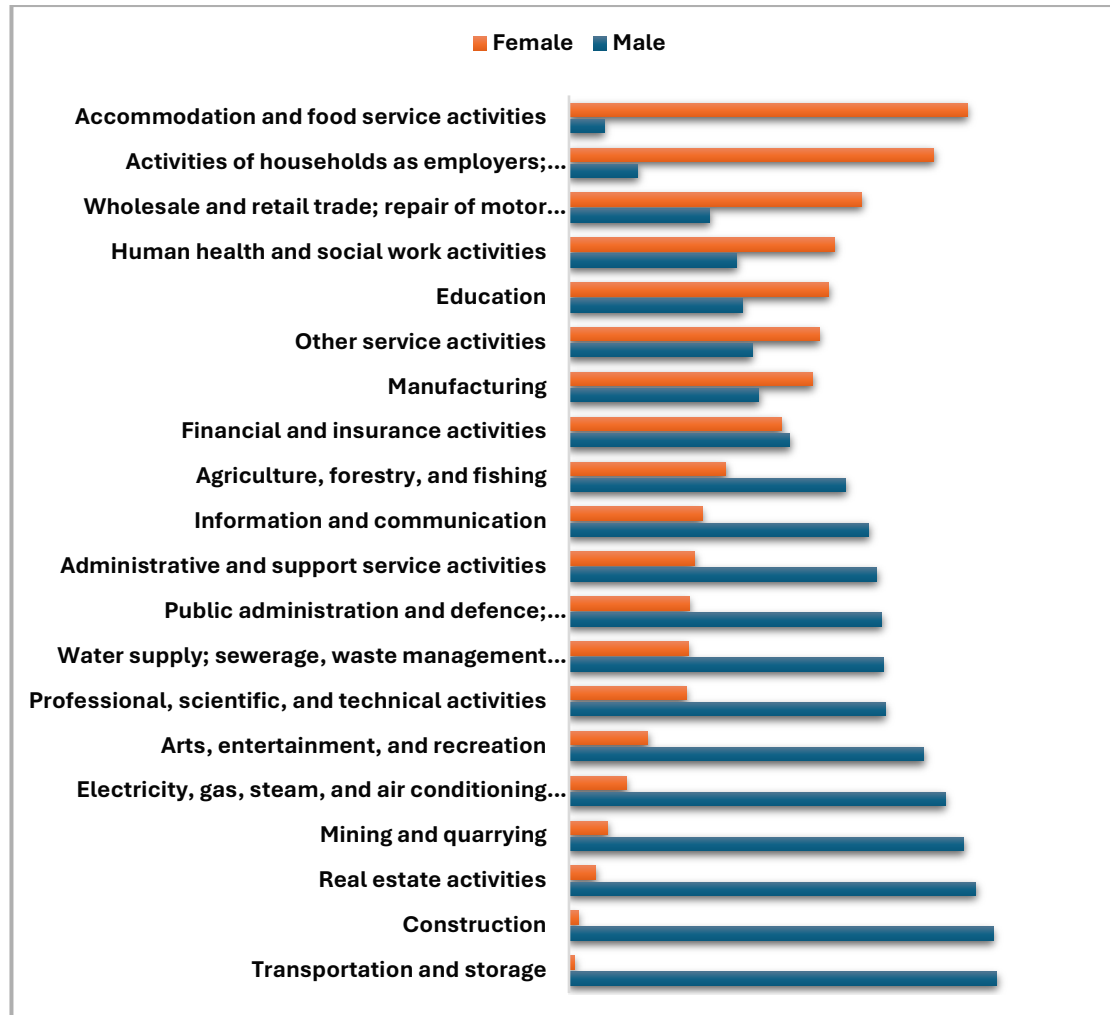

Figure 10: Economic Sector of Main Job by Sex

The table below shows the main jobs disaggregated by urban and rural areas and by sex across various economic sectors. In general, urban areas tend to have higher employment rates in information and communication (89.5%), financial and insurance activities (88.6%), professional, scientific, and technical activities (87.7%), and manufacturing (68.2%). On the other hand, rural areas had higher employment rates in agriculture, forestry, and fishing (68.7%).

Table 10: Economic Sector of Main Job by Residence and Sex

Economic Sectors	Male	Female	Urban	Rural
Agriculture, forestry, and fishing	63.8	36.2	31.3	68.7
Mining and quarrying	91.1	8.9	60.6	39.4

Activities of households as employers; undifferentiated goods- and services-producing activities of households for own use	15.9	84.1	90.6	9.4
Total	49.3	50.7	56.9	43.1

3.6 EMPLOYED PERSONS BY OCCUPATION

The International Standard Classification of Occupations (ISCO) is a system developed by the International Labour Organisation (ILO) to classify and categorize occupations worldwide. It provides a standardized framework for organizing and comparing information about occupations across different countries and regions. The proportion of Services and sales workers was 33.8%, skilled agricultural, forestry, and fishery was 28.1%, and clerical support workers represented 1.1% of the workforce.

Figure 11: Employed Persons by Occupation (%)

3.7 Unemployment Rate

The unemployment rate is defined as the share of the labour force (the combination of unemployed and employed persons) who are not employed but who are actively searching and are available for work. Unemployment is one of the components of labour underutilization. For the period under review, the national unemployment rate was 5.4% or 4,792,296 persons. Going by sex, the unemployment rate for males was 4.7% (2,062,701) while for females, it was 6% (2,729,595).

Considering the unemployment rate by place of residence, the rate was higher in Urban areas at 6.8% compared to rural areas at 3.5%. By age grouping, unemployment was highest among the youth population (15-24) with 10.1%, and lowest among persons aged 55-64. The youth unemployment rate is common for this age group, as they usually experience higher unemployment due to factors such as lack of work experience and limited availability of entry-level jobs.

In terms of educational attainment, the unemployment rate was highest at 9.4% among persons with post-secondary education. This was followed by those with secondary education at 6.7%, and those with primary education at 4.1%. The rate was lowest for those with no formal qualification at 3.2%.

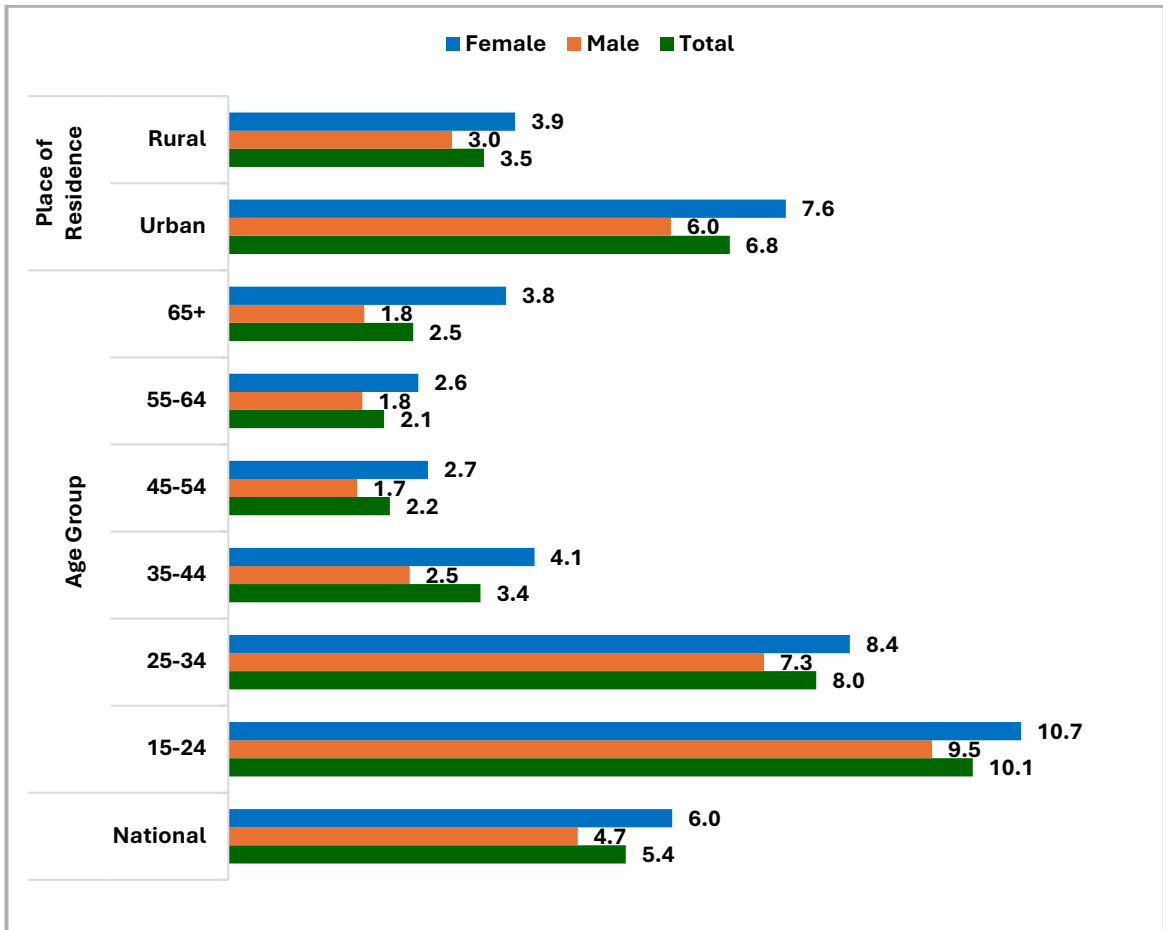

Figure 12: Unemployment Rate by Age Group and Place of Residence (%)

3.7.1 Unemployment Rate by State

Disaggregating the unemployment rate by state, Abia state recorded the highest rate with 18.7% followed by the FCT with 14.1%, and Rivers state with 13.4%. The lowest unemployment rates were recorded in Nasarawa, Sokoto, Kebbi, Benue, and Taraba states with 0.5%, 1.2%, 1.6%, 1.6%, and 1.9%, respectively.

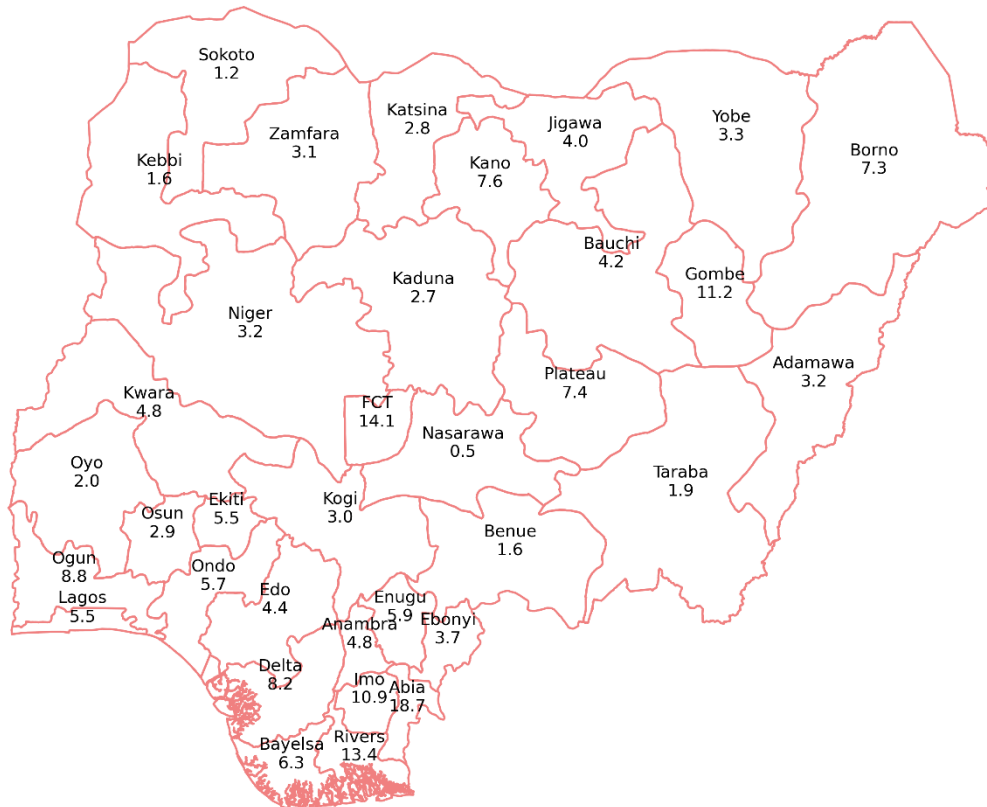

Figure 13: Map Showing Unemployment Rate

ZAMFARA	3.1	2.3	3.7

3.8 Time-related Underemployment Rate

The survey collected information on time-related underemployment, which is one aspect of labour underutilization. The time-related underemployment rate is defined as the share of employed people who are working less than 40 hours per week, but who would be willing and available to do more hours of work.

In 2023, the share of employed Nigerians that were underemployed was 11.1% or 9,381,670 persons. In disaggregating underemployment by sex, the share of employed men that were underemployed was 8.3% while the share of employed women that were underemployed was 13.4%. Disaggregation by place of residence, the underemployment rate was 9.7% in urban areas and 13.1% in rural areas. Time-related underemployment was highest among the age groups of 15-24, 25-34, and 35-44 at 16.7%, 13.8%, and 9.7%, respectively.

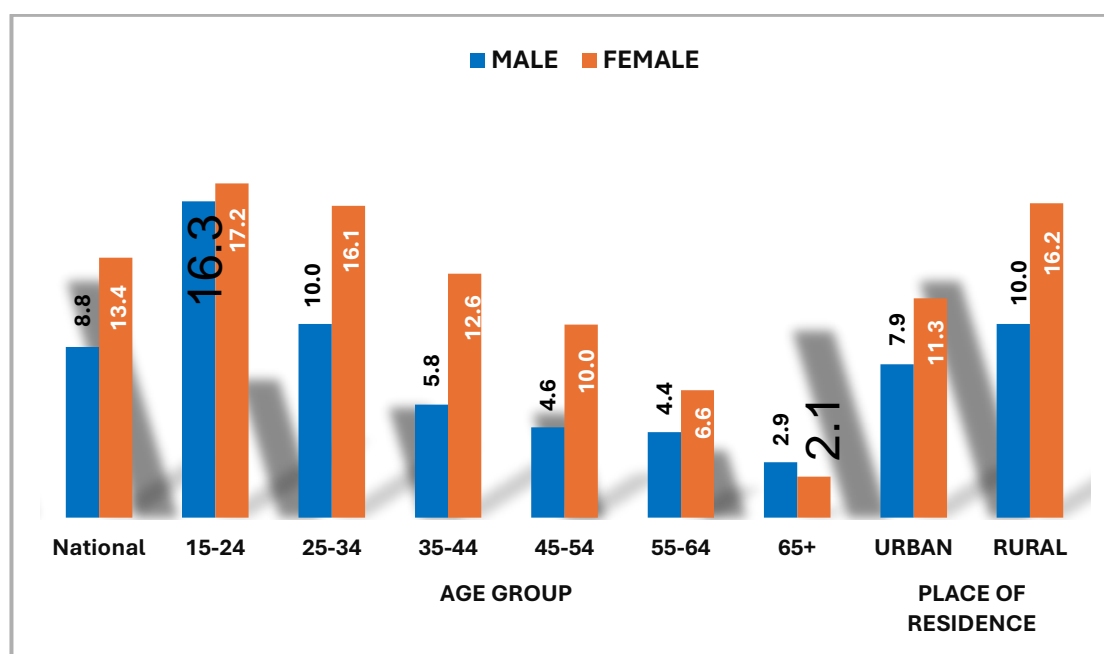

Figure 15: Time-Related Underemployment by Age Group and Place of Residence

Across various levels of education, individuals with lower educational attainment, particularly those with no education or only primary education, experienced higher rates of underemployment compared to those with secondary, post-secondary and post-graduate education. Specifically, individuals with no education had the highest distribution of 13.1% followed by primary education at 12.6%, and secondary education at 9.4%. On the other hand, post-secondary education showed a lower percentage at 8.5% while postgraduate education had the lowest percentage at 7.3%.

Table 12: Time-Related Underemployment Rate by Level of Education

Educational Level	Rate (%)	Male	Female
No Education	13.1	8.8	16.0
Primary	12.6	10.5	14.4
Secondary	9.4	7.9	11.3
Post-Secondary	8.5	8.1	9.1
Post-Graduate	7.3	7.8	6.0

3.8.1 Time-related Underemployment Rate by State

A state-level disaggregation showed that Plateau, Kaduna, and Yobe states reported the highest percentage of time-related underemployment at 33.9%, 31.1%, and 29.8%, respectively. In contrast, Nasarawa, Sokoto, and Edo states showed low rates of time-related underemployment at 0.3%, 1.2%, and 2.1%, respectively.

States that are heavily reliant on agriculture often experience seasonal fluctuations in employment opportunities, particularly during off-peak seasons when labour-intensive farming activities are low, leading to a notable increase in underemployment rates. The chart below depicts a ranking of states by their underemployment level.

Table 13: Underemployment Rate by State and Sex

States	Rate (%)	Sex	
		Male	Female
ABIA	4.9	5.6	4.3

3.8.2 Distribution of Working Hours

Working hours refer to the specific time an individual dedicates to their job or employment-related activities within a defined period, typically on a daily, weekly, monthly, or annual basis. These hours can vary based on factors such as the nature of the job, industry standards, employment contracts, and legal regulations.

This section reveals the time and pattern Nigerians spend on employment-related activities weekly. Nationally, 1.5% of employed Nigerians spent as little as 1-9 hours, and 46.8% spent Above 48 hours at work. This trend was observed among both male and female workers in the country. Typically, the combined proportion of Nigerians that worked between 1-9 hours (1.5%) weekly in the last 12 months and 4.8% that worked between 10-19 hours, was significantly low when compared to those that worked for 20-39 hours, 40-48 hours and Above 48 hours each.

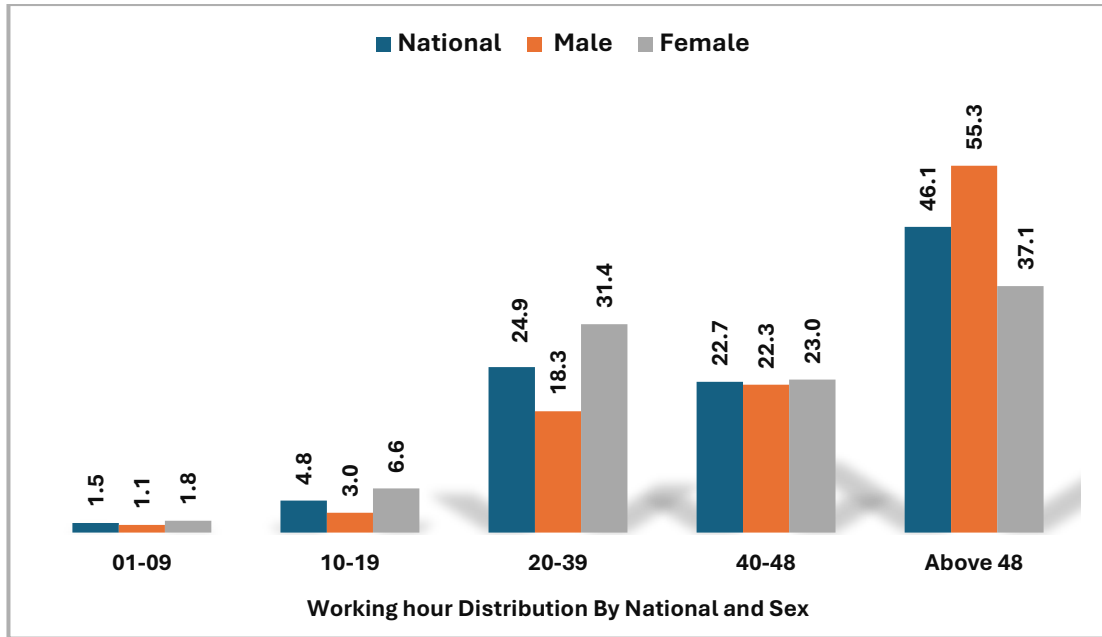

Figure 16: Working Hours Distribution by Sex and National (%)

3.9 Discouraged Job Seekers

Discouraged job seekers are persons outside the labour force who wanted employment and were currently available but did not seek employment during the reference period due to labour market-related reasons as listed below: –

- Past failure to find a suitable job.
- Lack of experience.
- Lack of qualifications or jobs matching the person’s skills.
- Lack of job.
- Considered too young or too old by prospective employers.
- Disabled or unable to work.

The annual labour force survey results showed that the share of persons outside the labour force who were discouraged job seekers was 3.6%. Among the males, the rate was 3.5% while the rate among females stood at 3.6%. The findings further revealed the proportion of discouraged job seekers in rural areas was 4.6% while urban recorded 3%.

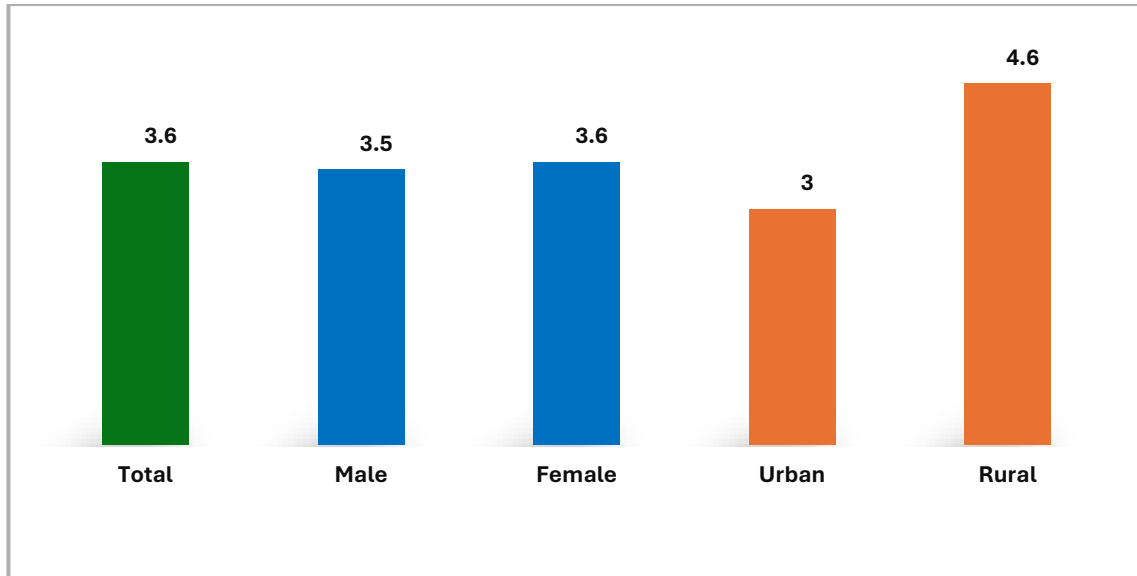

Figure 17: Discouraged Workers by Sex and Place of Residence (%)

3.9.1 Discouraged Job Seekers by State

Disaggregating further by states, Kaduna, Ebonyi and Imo states recorded the highest rates with 16.7%, 10.9% and 10.7%, respectively. On the other hand, states with the lowest rate of discouraged job seekers were Zamfara and Edo, both with 0.1%, then followed by Abia state with 0.3%. The table below shows the rate of discouraged job seekers by state and sex.

Table 14: Discouraged Job Seekers by State and Sex

3.10 Labour Underutilisation

Labour Underutilization refers to a mismatch between labour supply and demand, which translates into an unmet need for employment among the population. Indeed, to better reflect the unmet need for employment, one may consider in addition to unemployed people, part-time workers who want to work more, people who are available to work but do not look for work, and people who are looking for work but are not immediately available. These population subgroups constitute the concept of labour market slack.

Various standard measures of labour underutilization exist, which are based on measures of unemployment, time-related underemployment, and the potential labour force. The potential labour force covers those who are outside the labour force but who are either actively searching for paid work but not available or available but not actively searching.

Table 15: Labour Underutilization (LU1 - LU4)

Measure	Description	Rate (Total)
LU1	The unemployment rate.	5.4% (4,792,296)
LU2	The combined rate of time-related underemployment and unemployment as a share of the labour force.	15.9% (14,173,966)
LU3	The combination of the unemployed population and potential labour force as a share of the extended labour force, where the extended labour force is the combination of the labour force and the potential labour force.	8.3% (7,572,619)
LU4	The combination of time-related underemployment, unemployment, and the potential labour force as a share of the extended labour force.	18.5% (16,954,290)

Disaggregating further by gender, LU2 was highest for females (18.6%) while males were 13.1%. For LU3, females recorded 9.3% while males recorded 7.2%, and for LU4, it was 21.4% for females, while males were 15.4%.

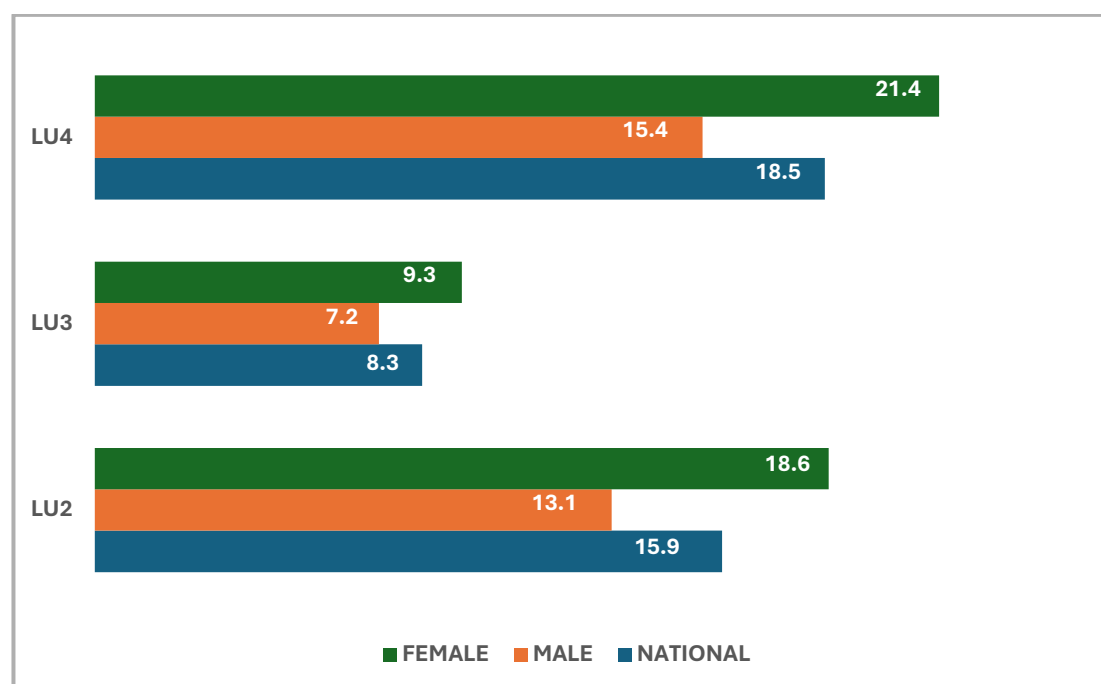

Figure 18: Labour Underutilization Disaggregated by Sex and National

3.10.1 Labour Underutilization by State

Further disaggregation by state shows that Plateau state recorded the highest under LU2 with 38.8%, while Nasarawa State recorded 0.8%. For LU3, Gombe recorded the highest rate with 21.2%, while Nasarawa state recorded 0.7% as the lowest in that category. Kaduna state was highest for LU4 at 39.4%, while Nasarawa state again came in lowest with 1.0%. The table below shows the rate of LU2 to LU4 for all the states.

Table 16: Labour Underutilization by State

3.11 Informal Employment

Informal employment can simply be described as work that lacks social and legal protections and employment benefits. It is a type of employment relationship that is generally based on a verbal agreement between an employee and an employer without signing an employment contract.

The survey results show that 77,561,393 individuals were engaged in informal employment which represents 92.2% of the employed population. The number of males in informal employment was 36,803,337 (88.7%) while that of females was 40,758,056 (95.6%).

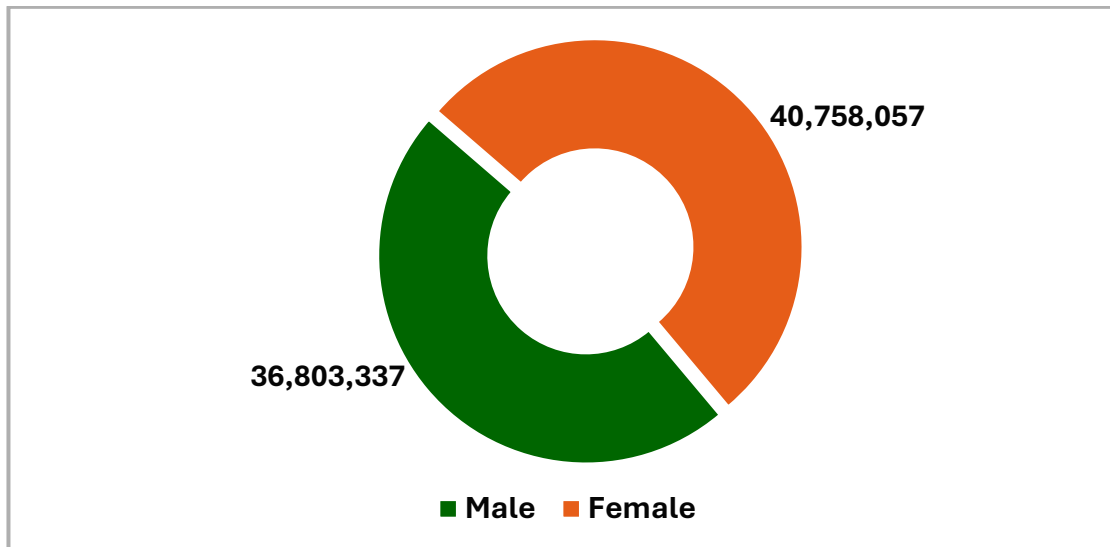

Figure 19: Informal Employment by Sex

Lagos state recorded the highest number of people in informal employment (excluding agriculture) with 4,565,556, closely followed by Kano (4,076,057) and Oyo states with 3,101,147. The state with the lowest number of persons in informal employment (excluding agriculture) was Benue state with 357,747. A broader state's performance is presented in table 17.

Table 17: Informal Employment by State and Sex

3.12 Not in Education, Employment or Training (NEET)

NEET conveys the share number of youths not in education, employment, or training as a percentage of the total youth population between the ages of 15-24 years. It is an indicator of unutilized youth human capital. It serves as a broader measure of potential youth labour market entrants beyond youth unemployment since it also includes young person outside the labour force not in education or training.

In Nigeria, the youth NEET rate was 15.6% (6,522,344) with females having 17.3% (3,104,068) and male with 14.1% (3,418,276). Further disaggregation by residence revealed that the NEET rate was higher in urban (17%) than in rural areas (13.5%) as shown in the chart below.

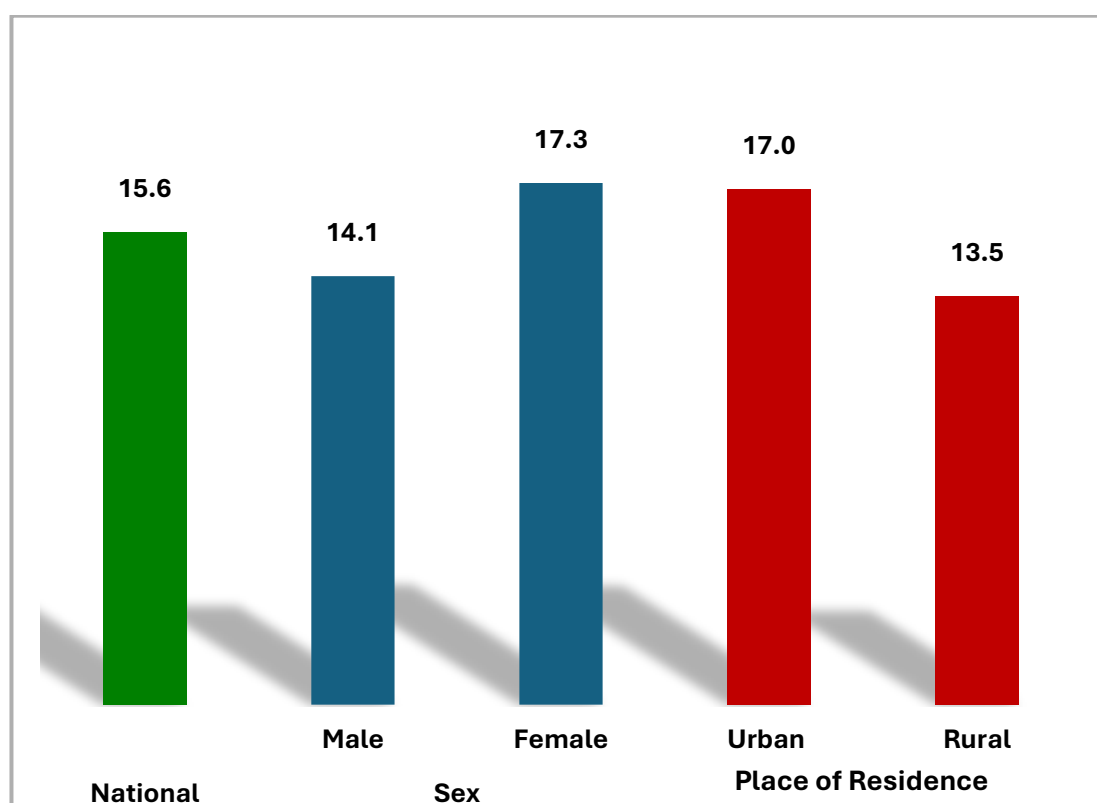

Figure 20: NEET (aged 15 -24 Years) by Sex and Sector

3.12.1 NEET by State

State-level disaggregation for the reference period indicated that Abia state had the highest NEET rate of 38.1% followed by Rivers state at 36.0%. Zamfara state recorded the lowest rate with 4.5% as shown in the figure below.

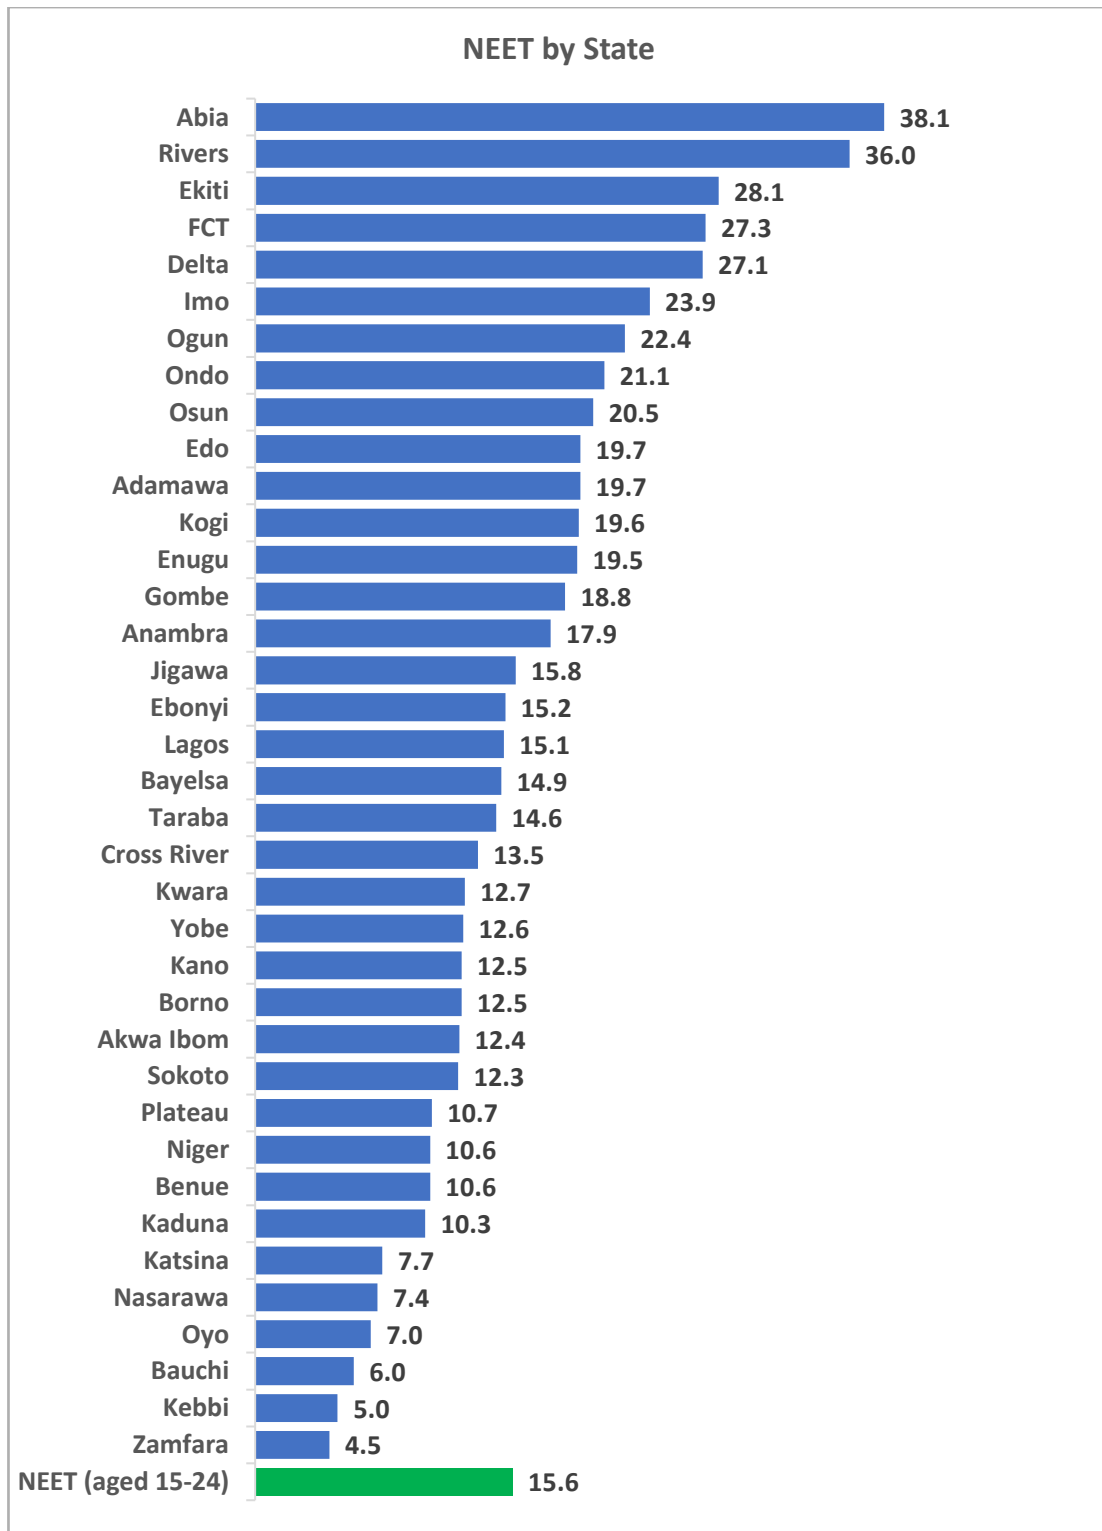

Figure 21: NEET Rate by State

NATIONAL BUREAU OF STATISTICS
NIGERIA LABOUR FORCE SURVEY (NLFS) 2024 QUESTIONNAIRE

SECTION A: IDENTIFICATION

		NAME	CODE	
ID1.	ZONE			
ID2.	STATE			
ID3.	LGA			
ID4.	EA			
ID5.	Sector (Urban = 1; Rural = 2)			

ID6.	Cluster Number		
ID7.	HH Serial Number		

ID9. HH Address: _____

ID10. Household head name: _____ ID11. Contact phone number: _____

Interviewer Name: _____

Consent: My name is ____ I am from the National Bureau of Statistics (NBS) as part of the team collecting information on households as it concerns labour force in Nigeria. We would value and appreciate your participation in this exercise. Whatever information you provide will be strictly confidential and anonymous. Participation in this survey is voluntary, and non-participation attracts no penalty, though we hope that you will participate since your views are important and will inform development planning in Nigeria. May I now begin the interview? ____ (1=Yes, 2=No)

HOUSEHOLD GPS LOCATION: Degree Decimal Degrees

GPS1. LATITUDE: _____

GPS1. LONGITUDE: _____

ID13. Response Status:

Completed	1
Not at home.....	2
Partially completed	3
HH not located.....	4
Refused.....	5
Moved away	6

SECTION D1: EMPLOYED AT WORK (ATW)

Proxy response is to be avoided in this section and subsequent sections.

ATW_1	In the last seven days, did you (NAME) work for someone else for pay, for one or more hours? <i>READ IF NEEDED: Examples: a regular job, contract, casual or piece work for pay, work in exchange for food or housing, paid domestic work.</i>	YES	01 <input type="checkbox"/>	→MJJ_1
		NO	02 <input type="checkbox"/>	
ATW_2	In the last seven days, did you (NAME) run or do any kind of business, farming or other activity to generate income? <i>READ IF NEEDED: Examples: commercial farming, selling things, making things for sale, construction, repairing things, guarding cars, brewing beer, collecting wood or water for sale, hairdressing, creche businesses, taxi or other transport business, having a legal or medical practice, performing in public, having a public phone shop.</i>	YES	01 <input type="checkbox"/>	→AGF_1b
		NO	02 <input type="checkbox"/>	
ATW_3	In the last seven days, did you (NAME) help in a household business or farm? <i>READ IF NEEDED: Examples: Commercial farming, help to sell things, make things for sale or exchange, doing the accounts, cleaning up for the business.</i>	YES	01 <input type="checkbox"/>	→AGF_1b
		NO	02 <input type="checkbox"/>	

SECTION D2: TEMPORARY ABSENCE (ABS)

ABS_1a	Do you (NAME) have a paid job or income generating activity, but did not work in the last seven days?	YES	01 <input type="checkbox"/>	→ ABS_2
		NO	02 <input type="checkbox"/>	
ABS_1b	Do you (NAME) have an unpaid job in any kind of business run by your household that you will return to?	YES	01 <input type="checkbox"/>	
		NO	02 <input type="checkbox"/>	→AGF_1a
ABS_2	Why did you (NAME) not work in the last seven days?			
		WAITING TO START NEW JOB OR BUSINESS	01 <input type="checkbox"/>	→AGF_1a
		LOW OR OFF-SEASON	02 <input type="checkbox"/>	
		WORKING TIME ARRANGEMENT, FLEXI TIME, NATURE OF WORK (FOR EXAMPLE, OFF-SHORE OIL WORKERS)	03 <input type="checkbox"/>	→AGF_1b
		VACATION, HOLIDAYS (ANNUAL LEAVE)	04 <input type="checkbox"/>	→AGF_1b
		SICKNESS, ILLNESS, ACCIDENT	05 <input type="checkbox"/>	→AGF_1b
		MATERNITY, PATERNITY LEAVE	06 <input type="checkbox"/>	→AGF_1b
		EDUCATION LEAVE OR TRAINING	07 <input type="checkbox"/>	
		OTHER PERSONAL LEAVE (CARE FOR FAMILY, CIVIC DUTIES...)	08 <input type="checkbox"/>	
		TEMPORARY LAYOFF, NO CLIENTS OR MATERIALS, WORK BREAK	09 <input type="checkbox"/>	
		BAD WEATHER, NATURAL DISASTER	10 <input type="checkbox"/>	

		STRIKE OR LABOUR DISPUTE	11 <input type="text"/>	→AGF_1b
		LONG-TERM DISABILITY	12 <input type="text"/>	
		OTHER (SPECIFY): _____	13 <input type="text"/>	
ABS_3	Including the time that you (NAME) have been absent, will you return to that same job or business...?	Within 3 months	01 <input type="text"/>	→AGF_1b
		After 3 months	02 <input type="text"/>	
		Not sure/Don't know	97 <input type="text"/>	
ABS_4	Do you (NAME) continue to receive an income from your job or business during this absence?	YES	01 <input type="text"/>	→AGF_1b
		NO	02 <input type="text"/>	→AGF_1a
		DON'T KNOW	97 <input type="text"/>	→AGF_1a

SECTION D3: AGRICULTURAL WORK AND MARKET ORIENTATION (AGF)

AGF_1a	In the last seven days, did you (NAME) do any work in... ?		
	<i>READ AND MARK ALL THAT APPLY</i>		
	Crop farming	a. <input type="checkbox"/>	→AGF_2a
	Rearing farm animals	b. <input type="checkbox"/>	→AGF_2a
	Fishing or fish farming	c. <input type="checkbox"/>	→AGF_2a
	<i>DO NOT READ</i>		
	NONE OF THE ABOVE	d. <input type="checkbox"/>	→Section F
AGF_1b	Was this work that you (NAME) mentioned in...?		
	<i>READ AND MARK ALL THAT APPLY</i>		
	Crop farming	a. <input type="checkbox"/>	
	Rearing farm animals	b. <input type="checkbox"/>	
	Fishing or fish farming	c. <input type="checkbox"/>	
	Another type of job or business	d. <input type="checkbox"/>	→MJJ_1
AGF_2a	Thinking about the work in farming, rearing animals, and/or fishing you (NAME) do, are the products intended only for sale, both for sale and for household use, or only for household use?		
	<i>READ AND MARK ONE</i>		
	Only for sale	01 <input type="checkbox"/>	→MJJ_1
	Both for sale and for household use	02 <input type="checkbox"/>	
	Only for household use	03 <input type="checkbox"/>	→AGF_2d
AGF_2b	Thinking about those products, what share is intended to be sold?		
	Less than ¼ (25 percent)	01 <input type="checkbox"/>	→ AGF_2d
	¼ (25 percent)	02 <input type="checkbox"/>	→ AGF_2d
	½ (50 percent)	03 <input type="checkbox"/>	
	¾ (75 percent)	04 <input type="checkbox"/>	→MJJ_1
	More than ¾ (75 percent)	05 <input type="checkbox"/>	→MJJ_1

AGF_2c	In general, in the past, have these products mainly been sold or kept for household use?	<p style="text-align: right;">Mainly sold Mainly kept for household use</p> <p>Respondent insists that precisely ½ (50 percent) was sold and ½ (50 percent) was kept for household use</p>	<input type="checkbox"/> 1 <input type="checkbox"/> 2 → MJJ_1 <input type="checkbox"/> 3 → MJJ_1
AGF_2d	Were you (NAME) hired by someone else to do this work?	<p style="text-align: right;">Yes No</p>	<input type="checkbox"/> 1 → MJJ_1 <input type="checkbox"/> 2
AGF_3a	What are the main products from farming, rearing animals, and/or fishing that you (NAME) were working on? <i>PLEASE YOU MAY LIST ONE OR MORE PRODUCTS</i>	<p style="text-align: right;">Main Goods _____</p>	
AGF_3b	<i>READ IF NEEDED</i> Examples: citrus fruits, vegetables, freshwater fish, cattle, chicken, rice.	<p style="text-align: right;">ISIC CODE: <input type="checkbox"/><input type="checkbox"/><input type="checkbox"/><input type="checkbox"/></p>	
AGF_4	In the last seven days, on how many days did you (NAME) do this work?	<p style="text-align: right;"><i>NUMBER OF DAYS</i></p> <hr/> <p style="text-align: right;">DID NOT DO THIS WORK LASK WEEK 97 → AGF_6</p>	
AGF_5	How many hours per day did you (NAME) spend doing this work in the last seven days?	<p style="text-align: right;"><i>HOURS PER DAY</i></p> <hr/>	
→Section F			

SECTION E: CHARACTERISTICS OF MAIN AND SECONDARY JOB, WORKING TIME, AND INCOME

MJJ_1	<p>In the last seven days/Typically, did you (NAME) have more than one job or income generating activity? 1=ONE JOB/BUSINESS Go to MJJ_2a 2=MORE THAN ONE JOB/BUSINESS</p> <p><i>If the respondent is employed at work in the last seven days, both main job and secondary job must have at least one hour of work in the last seven days.</i></p>	<p>1 <input type="checkbox"/></p> <p>2 <input type="checkbox"/></p>
MJJ_2	<p>INTERVIEWER TO READ: I am now going to ask you some questions about your main job, that is the income-generating activity in which you (NAME) usually work the most hours.</p>	
MJJ_2a	<p>In your (NAME's) main job, what kind of work do you do?</p> <p><i>Examples: Cattle farmer – breed, raise and sell cattle; Policeman – patrol the streets; Cook – plan and prepare meals; Primary school teacher – teach children how to read and write.</i></p>	<p>----- OCCUPATIONAL TITLE, IF ANY</p>
MJJ_2b		<p>----- MAIN TASKS AND DUTIES</p>
MJJ_2c		<p>----- ISCO</p>
MJJ_3a	<p>What is the main activity of the establishment or business where you (NAME) work?</p> <p><i>This is also known as your “your place of work”. Examples include: Police Department – public safety; Restaurant – preparing and serving meals; Transport company – long distance transport of goods.</i></p>	<p>----- MAIN ACTIVITY</p>
MJJ_3b		<p>----- GOODS OR SERVICES</p>
MJJ_3c		<p>----- ISIC</p>
MJJ_4	<p>Do you (NAME) work...?</p> <p>1=As an employee 2=In your own business/farming activity 3=Helping in a household business 4=As an apprentice, intern 5=Helping a household member who works for someone else</p>	<p>1 <input type="checkbox"/> →MJJ_8a 2 <input type="checkbox"/> →MJJ_6 3 <input type="checkbox"/> 4 <input type="checkbox"/> →MJJ_8a 5 <input type="checkbox"/> →MJJ_8a</p>

The following set of questions is for workers who self-identify as helping in a household business (self-identified in MJJ_4)

MJJ_5	Who usually makes the decisions about the running of the household business?		
READ			

	You (NAME)	01	<input type="checkbox"/>	
	You (NAME) together with others	02	<input type="checkbox"/>	
	Other household member(s) only	03	<input type="checkbox"/>	→MJJ_8b
	Other person(s) only	04	<input type="checkbox"/>	→MJJ_8b

The following set of questions is for those self-identified as self-employed (self-identified in MJJ_4)

MJJ_6	Does your (NAME's) business hire any paid employees on a regular basis?	YES	01	<input type="checkbox"/>	
		NO	02	<input type="checkbox"/>	
MJJ_7a	Can you (NAME) set the price of the products or services that you offer yourself?	YES	01	<input type="checkbox"/>	→MJJ_9a
		NO	02	<input type="checkbox"/>	
MJJ_7b	Why cannot you (NAME) set the price? Is it because?				
	<i>READ</i>				
	Another enterprise or agent sets the price		01	<input type="checkbox"/>	→MJJ_9a
	Prices are set by the customer(s) (a take it or leave it offer)		02	<input type="checkbox"/>	→MJJ_9a
	Government defines the price by law/regulation		03	<input type="checkbox"/>	→MJJ_9a
	Prices are negotiated with the customer		04	<input type="checkbox"/>	→MJJ_9a
	It's the going rate on the market		05	<input type="checkbox"/>	→MJJ_9a
	Other (specify): _____		06	<input type="checkbox"/>	→MJJ_9a

The following set of questions is for those identified as employees, apprentices, or those assisting household members (self-identified in MJJ_4). Questions from MJJ_8d onwards are also addressed to contributing household workers.

MJJ_8a	In this job are you (NAME) working in....?			
	<i>READ</i>			
	Federal government	01	<input type="checkbox"/>	
	State government	02	<input type="checkbox"/>	
	Local government	03	<input type="checkbox"/>	

	<p style="text-align: center;">State-owned enterprise <input type="checkbox"/> 4</p> <p style="text-align: center;">Private sector (including paid apprentices) <input type="checkbox"/> 5</p> <p style="text-align: center;">Farm(s) <input type="checkbox"/> 6</p> <p style="text-align: center;">Household(s), as a domestic worker <input type="checkbox"/> 7</p> <p style="text-align: center;">NGO <input type="checkbox"/> 8</p> <p style="text-align: center;">Co-operatives <input type="checkbox"/> 9</p> <p style="text-align: center;">International organization / Diplomatic mission <input type="checkbox"/> 10</p> <p style="text-align: center;">Religious organization <input type="checkbox"/> 11</p> <p style="text-align: center;">Other (specify): <input type="checkbox"/> 12</p> <p style="text-align: center;">_____</p>		
MJJ_8b	<p>Which of the following types of pay do you (NAME) receive for this work?</p> <p style="text-align: center;">READ AND MARK ALL THAT APPLY</p> <p style="text-align: center;">A wage or salary <input type="checkbox"/> a</p> <p style="text-align: center;">Payment by piece of work completed <input type="checkbox"/> b</p> <p style="text-align: center;">Commissions <input type="checkbox"/> c</p> <p style="text-align: center;">Tips <input type="checkbox"/> d</p> <p style="text-align: center;">Fees for services provided <input type="checkbox"/> e</p> <p style="text-align: center;">Payment with meals or accommodation <input type="checkbox"/> f</p> <p style="text-align: center;">Payment in products <input type="checkbox"/> g</p> <p style="text-align: center;">OTHER CASH PAYMENT (Specify): _____ <input type="checkbox"/> h</p> <p style="text-align: center;">NOT PAID <input type="checkbox"/> i →MJJ_9a</p>		

MJJ_8c	Do you (NAME) have a written contract or oral agreement for the work you do?	YES, WRITTEN CONTRACT	01 <input type="checkbox"/>	→ MJJ_8j
		YES, ORAL AGREEMENT	02 <input type="checkbox"/>	
		NO	03 <input type="checkbox"/>	
		DON'T KNOW	97 <input type="checkbox"/>	
MJJ_8d	Does your (NAME's) contract or agreement specify the number of hours you are supposed to work?	YES	01 <input type="checkbox"/>	→ MJJ_8f
		NO	02 <input type="checkbox"/>

Annex 3: Definition of Labour Market Indicators

Indicators	Numerator	Denominator	Multiplier
Labour Force Participation Rate (LFPR)	Labour force population	Working age population	X100
Employment-to Population Ratio (EPR)	Number employed		X100
Unemployment Rate	Persons in unemployment		X100
Extended Labour Force	Labour force population + potential labour force population		
LU2	Persons in time-related underemployment + unemployed persons	Labour force population	X100
LU3	Employed persons + potential labour force population	Extended labour force population	X100
LU4	Population of time-related underemployed + unemployed + potential labour force	Extended labour force population	X100
Youth NEET Rate	Youth (15-24 years) not in employment, in education or training	Youth population	X100
Time-related Underemployment Rate	Persons in time-related underemployment	Employed population	X100
Informal Employment Rate	Number of persons in informal employment	Employed population	X100
Rate of Potential Labour Force	Potential labour force population	Working age population	X100
Discouraged Jobseekers	Number of discouraged jobseekers	Population outside of the labour force	X100
Own-use Producers of Foodstuffs	Number of persons in subsistence agriculture	Working Age Population	X100

Annex 4: Definition ISIC and ISCO Indicators

Employment by Industrial Sector (ISIC)

S/N	OCCUPATIONS	DEFINITIONS
1.	Agriculture, forestry, and fishing	Crop and animal production, hunting and related service activities, Growing of non-perennial crops, Growing of perennial crops, Raising of sheep and goats, etc
2.	Mining and quarrying	Mining of coal and lignite, Mining of lignite, Extraction of crude petroleum and natural gas, Quarrying of stone, sand and clay, etc.
3.	Manufacturing	Manufacture of food products, Processing and preserving of meat, Processing and preserving of fish, Manufacture of vegetable and animal oils and fats, etc.
4.	Electricity, gas, steam, and air conditioning supply	Electricity, gas, steam and air conditioning supply, Electric power generation, transmission and distribution activities, Steam and air conditioning supply, etc.
5.	Water supply; sewerage, waste management and remediation	Water collection, treatment and supply, Sewerage, Waste collection, treatment and disposal, and recovery activities, Collection of non-hazardous waste, etc.
6.	Construction	Construction of residential and non-residential buildings, Civil engineering, Construction of roads and railways, Construction of utility projects, etc.
7.	Wholesale and retail trade; repair of motor vehicles and motorcycles	Wholesale trade, Wholesale of agricultural raw materials and live animals, Wholesale of computers, computer peripheral equipment and software, Wholesale of other machinery and equipment, etc.
8.	Transportation and storage	Land transport and transport via pipelines, Transport via railways, Passenger rail transport, interurban, Freight rail transport, Urban and suburban passenger land transport, etc.
9.	Accommodation and food service activities	Hotels and similar accommodation activities, Hotels and similar accommodation activities, Other short term accommodation activities, Other short term accommodation activities, etc.
10.	Information and communication	Wired, wireless, and satellite telecommunication activities, Telecommunication reselling activities and intermediation service activities for telecommunication, etc.
