KANO STATE 2005 BUDGET PROPOSALS
- Economic Development and Empowerment Budget -

Address by His Excellency, the Executive Governor of
Kano State, Malam Ibrahim Shekarau to the
Kano State House of Assembly

Shawwal 27, 1425
December 8, 2004

Courtesies,

All praise and gratitude are due to Allah, the Lord of the worlds. May the blessings of Allah be upon our exalted Prophet, the Messenger of Allah, Muhammad Sallallahu Alaihi Wassalam, his companions, the members of his family and all those who tread their path till the Day of Judgment.

1. It is almost one year since I stood on this podium to present before you our administration's maiden budget, which I tagged "Foundation Budget". I still recall my remarks on that occasion when I said 'the proposal would serve as a constructive determinant for the accomplishment of our mission for Shari'ah implementation, human development and societal reorientation'.

Restricted

2. Mr. Speaker, Honourable members, many events of consequence have taken place ever since those remarks were made. I must therefore say Alhamdu Lillah for sparing our lives, and for making it possible to stand before you once again to present the Appropriation Bill for the Year 2005 which I humbly refer to as "***Economic Development and Empowerment Budget.***" As we have, from all analogies, intents and purposes, succeeded in charting a course for addressing facets of development for the State in the previous budget, it is only natural that we now delve into the real business of governance; the business of developing the social and economic capacities of the people. Before I go into the details of the proposition of our government however, permit me to give a brief overview of some of our accomplishments during the year and recount the obstacles we encountered in the course of implementing the 2004 Budget. In the process Mr. Speaker, I will also highlight both the challenges and the prospects ahead.

Shari'ah Implementation:

3. In keeping with the pledge to commit ourselves to the pursuit of Shari'ah implementation in all its facets, may I report that we have, with all modesty, succeeded in facilitating full scale activity in all the newly established Shari'ah Implementation Agencies. Government has expended over the sum of N125million in funding the operations of these Agencies. This made it possible for the Shari'ah Commission, the Zakkat and Hubsu Commission and indeed the Hisbah Board to undertake several activities in the areas of Shari'ah Implementation, including the maiden distribution of Zakkat to the needy.

4. It is also worth reporting that during the year we have succeeded at reinvigorating the activities of Hisbah in the State through the training and retraining of its cadres throughout the State. This should translate into significant improvement in the quality of operations of the Hisbah, thereby enhancing their contributions to Shari'ah implementation. It should be noted, Mr. Speaker, that when we came into power, we met a sharply divided Hisbah - the Government-controlled and the independent - with a high degree of antagonism prevailing between them. Our first task therefore was to re-organise the movement with a view to integrating the two factions, before we began the screening and recruitment of full time Hisbah men and officers. Presently, I am humbled to say, we have succeeded in giving a 6-week training to local government commanders of the Hisbah, and are warming up to accord the same treatment to other cadres. In addition to these efforts, Mr. Speaker, and in our desire to make Hisbah fully equipped and functional, we provided funds for the purchase vehicles and new uniform for the movement, which will soon be launched in-sha-Allah.

5. On another score, may I report the positive contribution of members of the Shari'ah Commission and other ulama for their remarkable work on public enlightenment throughout the month of Ramadan. Their contributions have registered tremendous impact and have complemented Government's efforts at positive transformation of the individual, and the promotion of sense of community. For instance, they prepared and submitted to the Government, proposals on the sale

and consumption of alcoholic drinks in Kano, the conduct of motorists and cyclists on our roads and on measures in the market. These proposals prompted the Government to submit a number of bills to the Kano State House of Assembly for deliberation and ratification. I am gratified to say, this esteemed House has sanctioned and passed into law the bill on sale and consumption of alcoholic drinks and the bill that sought the cancellation of all licenses for the sale of intoxicants issued by government in previous years.

Societal Reorientation:

6. Honourable Speaker, our administration has made significant progress on the implementation of other key social initiatives that I announced in my 2004 Budget Speech. Consider the launching of our program on Societal Reorientation in August, 2004. As I indicated to you earlier, Societal Reorientation Programme is a part of the wider vision of the administration to position the State onto the path of community-based sustainable progress under the guidance and teachings of Islam.

7. It is gratifying to report that public encomiums, before, during and after the launching of the programme, showed clearly that the overwhelming majority of citizens are in support of the initiative and are prepared to extend every form of cooperation to achieve its stated objective. We once again thank Allah the Almighty for His blessings.

Security:

8. Esteemed members of the Assembly, the year 2004 afforded us another period of peace in the State as evidenced by the continued decline of violent crimes and other negative traits inimical to societal peace. This is indeed a noteworthy achievement, one that we should all continue to crave and pray for.

9. However, the year 2004 has not been without serious challenges to our resolve to maintain the peace. Recall the unfortunate incidence in the wake of April 2004 Elections into the Local Government Councils and other painful events that took place outside of our State, yet reverberated in the State. We once again thank Allah the Almighty, that in spite of the wicked machinations of some misguided few in our midst, we were able to overcome the challenges and to restore peace and harmonious co-existence. Even so, I must observe before this noble house that these wicked people are not about to abandon their schemes. There is therefore a need for all well meaning citizens to remain alert and to ensure that they do not get involved with any group or action that could disrupt the peace.

10. As I admonish against disrupting the peace, I must also recognize those who immensely contributed in maintaining the peace. The contributions of Security Agencies, His Royal Highness the Emir of Kano, and religious leaders deserve a special mention. Nevertheless, this administration is also grateful for the contributions of our auxiliary security organisations, community leaders and indeed the larger society for always standing firm on the side of government through their prayers for peace and prosperity to prevail in the State.

On our part, I wish to reaffirm the commitment of government to continue to explore and pursue ways for sustaining the prevailing atmosphere of peace and harmonious co-existence within and among the various communities in the State. Allow me also to once again pledge our commitment to work closely with all security agencies and other security support services working in this State. Indeed it is in consequence of our commitment to peace and security that our administration is always prepared to extend support to them. It may interest this esteemed Assembly that Government has purchased 32 pick-up vans, 20 motorcycles and 1 truck, among other things, for the Police, and is presently arranging to hand them over in occasion coming soon.

General Administration:

11. Redeeming our pledge to reinvigorate the civil service for improved service delivery and effective implementation of the programmes and policies of the administration remains a priority. Throughout the year, we continued to pay attention to the various efforts at rejuvenating the service, started from our inception: We significantly increased overhead allocations and disbursements to ministries and other agencies of government to facilitate smooth operations. We also revitalized the process of salary payments such that civil servants receive their salaries and other emoluments as and when due.

12. Considering the importance of manpower development to efficient and effective government operations, our administration found it

desirable to pursue and promote training and retraining of civil servants. Consequently, the sum of over ₦20 million was expended by the Office of the Head of Civil Service on various training programmes. We have also taken series of retreats for top functionaries of government to enhance efficiency and dedication to duty. I remember, Mr. Speaker that members of this respected House also partook in a retreat that was geared towards enhancing cordiality and understanding between the executive arm of Government and the Legislature.

13. Another priority area affecting the public service sector is the settlement of pension and pension arrears, gratuity and death benefits to our heroes past, most of whom sacrificed the best part of their lifetimes to put in place an enduring foundation for the prosperity of the State and its citizens. In this binding undertaking, the sum of ₦1,673,149,205.00 has been paid to over 9554 beneficiaries between January and September, 2004.

14. In a related undertaking, government has paid the sum of over ₦10 million to the families of 412 civil servants who died in active service. We have also paid the sum of over ₦128,344,768.40 as 2.5 % State Government's statutory contributions on Local Government Pensions.

15. Similarly, the sum of ₦646,205,797.09 was expended on the settlement of pensions and pension arrears, gratuity and death benefits to over 5000 Local Government pensioners between January

and September 2004. In the same token, another sum of ₦17, 101,774.46 was paid to 110 staff of the Local Government Service who lost their lives while in active service.

16. Mr. Speaker, Honourable members, promoting the culture of accountability and transparency in public service remains a key undertaking of this administration. Thus in addition to the various efforts at re-awakening the society on the significance of these virtues, we have, in the course of the year conducted a review of the Civil Service Rules, and Financial/Stores Regulations. It is our hope that the revised instruments when fully operational will further complement the ongoing effort to instill discipline and probity in public affairs, and by extension the larger society.

Agriculture:

17. Developing the agric sector for improved food and cash crop production remains a priority area for our administration. Our commitment to mass food production since we assumed office in May 2003 signifies our determination to make our State self-reliant.

18. Allow me, Mr. Speaker, Honourable Members to report to you that this administration has expended the sum of ₦2, 155,803,299.9 between January and September on Agriculture and related activity. These comprise of components of the mass food production programme, fertilizer procurement and its subsequent distribution at the highly subsidized rate of ₦1,000 per bag, much lower than anywhere in Nigeria. Other activities include livestock development, improvement of

livestock and cattle grazing reserves, fadama development as well as procurement and distribution of vital farm inputs, including seeds, agro-chemicals and tractors to farmers. It is also important to mention that the timely and orderly distribution of the commodity had positively impacted on farmers throughout the State more than at any other time in the recent past.

19. In the area of provision of other farm inputs and implements, we succeeded at procuring and distributing 50 tractors at the cost of ₦106, 562,777.80, to the 44 Local Government Areas of the State. This is yet another intervention in support of the Government's mass food production programme. In addition, government has distributed sufficient quantities of improved seeds, agro-chemicals and other vital farm inputs to the farmers in the last planting season. Our improved seeds proved very rewarding, and in some areas savior to the farmers who tried them.

20. Our proposed Work Bull Scheme under which we sought to make available to our participating farmers a loan of ₦185 million through our banking partners could not be implemented this year. This was because even though government had already provided its contribution of ₦35million, our partners were not forthcoming, thereby impeding a timely launch. Timing our rainy season is critical for the success of our farming, as you all know. Because of this, we have decided to discontinue further negotiations with the Bank, and are exploring other avenues of implementing the scheme in the coming financial year.

Restricted

IX

23. As part of our effort to promote the development of the livestock sector, we expended the sum of over ₦10 million to improve grazing reserves and cattle routes throughout the State. By focusing attention on grazing space, government hopes to gradually eliminate one thorny area of perennial conflict between farmers and herdsmen.

24. Mr. Speaker, Honourable members, in keeping with our determination to improve the quality of life of our citizens as well as help our farmers get value for their products, the administration found it desirable to intervene by purchasing excess grains from farmers for subsequent sale to the public in times of need. A total of 6,080 tons of assorted grains were procured at the cost of ₦196million. These assorted grains are being sold to the general public at highly subsidized rates, to cushion the effects of rising cost of food items.

Commerce and Industry

25. The commercial and industrial sector remains the backbone of our economy in terms of employment and material contribution to our economic growth and development. Regrettably, this sector continues to witness low-level activity due to the recession facing the Nation. In spite of this draw back, and in keeping to our pledge to resuscitate this ailing sector, we initiated several measures to remedy the situation. These include engagement with the Federal Government, Manufacturers Association of Nigeria (MAN) and several other stake holders in the sector, to attract investors and investment to the State.

Restricted

X

26. We have also undertaken Trade Missions to the U.S.A., Turkey, China, and Yugoslavia. The contacts made possible by these missions were generally quite promising. In fact our administration has never failed to take full advantage of any opportunity on our official trips overseas or engagements with foreign missions or organisations to advertise our potentials and foster bilateral relations in trade and commerce.

27. At Governmental level, the State Ministry of Commerce is being encouraged and supported to exploit the opportunities modern business methods could offer, including e-Commerce as a way of securing trade and investment opportunities for our citizens. Government is also making an effort to see to the project take off at the Kano Export Processing Zone and Inland Dry Port. I must, however admit that this exercise is both arduous and challenging, and requires commitment, resilience and perseverance on the part of all of us.

Transport:

28. The transport sector plays a crucial role in the economy and in our overall development process. Consequently, we found it appropriate to establish a new Ministry of Transport and Tourism to articulate relevant policies to guide government initiatives and future plans in this all-important sector. It is gratifying to report that the Ministry had successfully taken off and is currently articulating policies and programmes to translate our vision to reality. Already arrangements have been completed for the purchase of 100 commuter buses and 500

tricycles, the use of which will be launched by the Government, in-sha-Allah.

29. In the area of road construction, may I report that we have succeeded at completing most of the projects initiated in the year 2003. These include: Bello Road, Hausa-Igbo Road, Burma Road, Yola Road, Beirut Road, Lamido Crescent and Dakata-Yankaba Road. We have also at different periods during the year awarded contracts for the rehabilitation/construction of a number of metropolitan roads. These include, Tukuntawa-Sharada Road, Dawaki Road, IBB Road, Audu Bako Way, Lagos Street, Jakara Road, Ja'oji Road; and the rehabilitation/beautification of ten (10) Roundabouts. These projects, costing approximately ₦1 billion, are mostly expected to be completed before the end of the first quarter of 2005.

30. Other accomplishments in the sector include the commencement/continuation of construction work on Dal-Gani-Musa-Gomo road, Madobi-Bebeji Bridge, Challawa Bridge, Dadin Kowa-Kudaru Road, Kwanar Zira-Danguguwa Road, Zaura Bridge, Challawa-Garu Bridge, Karfi-Rano Road, Danbazau-Farinruwa Road, Madobi-Yako and other bridges at the total cost of ₦846,239,071.96 million.

Mass Transit:

31. Kano's position as a leading centre for commerce and indeed the most populous State in the Federation makes transportation a vital requirement. Consequently, Government found it necessary to acquire 100 commuter buses, and 500 tricycles. Already the tricycles have

been ordered and are expected to be delivered shortly. This is in addition to an earlier intervention in the sector where motor-cycles were provided to unemployed youth under a special discounted loan arrangement.

Education:

32. Mr. Speaker, salvaging the education sector from continued decline has been an important and urgent priority of the administration since we assumed office. Considering the enormity and desperate nature of the problems, I had course to request the approval of this House to spend the sum of ₦872, 115,620.00 on capital works and other related undertakings in the sector in the Year 2004 Budget.

33. During the period under review we have, with all sense of modesty, made considerable progress in several key areas, particularly in the areas of provision of instructional materials, rehabilitation of classrooms, laboratories and dormitories. Likewise, in an effort to address the perennial problem of transition from Primary to Junior Secondary Schools, and Junior to Senior Secondary Schools, we found it necessary to expand some of our Primary and Secondary Schools. Consequently, new Junior Secondary Schools were established, while additional classes were constructed across the State. We have also continued to recruit qualified teachers in key subjects such as Mathematics, Physics and English.

34. In the area of Tertiary Education, we maintained unwavering commitment to qualitatively improve the sector through provision of modern learning facilities, renovation/rehabilitation of existing

infrastructure, incentives to academic and non academic staff and various other support necessary for learning at that level. In particular I would want to highlight Government's support to the Kano University of Technology (KUT) where over ₦160 million was expended on financing capital and other recurrent commitments between January and September 2004. This, by our reckoning, made the University one of the best among its peers in terms of funding.

35. On another related note, Honourable members would be interested to know that in keeping with our pledge to extend support to students of tertiary institutions, we have increased students' allowances and reformed the process of scholarship awards, making it now easier for eligible students to get access to the facility. Today, I can report to you that we have already expended a total sum of ₦112,743,200.00 on payment of Scholarship allowances to 12,132 new and continuing students, including their outstanding arrears.

Health:

36. Despite the numerous problems facing the health sector owing to our large population, the State Government is making steady progress towards addressing a number of these problems to ensure improved health service delivery. From January to September 2004, the State Government has expended the sum of over ₦1.33 billion in funding both recurrent and capital undertakings in the sector. Some of the works undertaken include renovation/rehabilitation works at Murtala Muhammad Specialist Hospital, Nassarawa Specialist Hospital, Sir

Muhammad Sunusi, Hasiya Bayero Pediatric Hospital and Waziri Shehu Gidado Hospital.

37. Other projects that we executed in the year include procurement and installation of Stand-by Generators at various Hospitals in the State, provision of specialized medical equipment, drugs and other medical consumables. Government has also carried out various renovation/rehabilitation works at several other urban hospitals in Gaya, Wudil, Sumaila, Gezawa, Danbatta, D/Kudu, Bichi, Minjibir and Madobi.

38. In the effort to develop our professionals in the health sector, we undertook major renovation works at the School of Nursing Kano.

39. The provision of free medical treatment for victims of accident and emergency as well as for expecting mothers remains an important priority for the administration. During the period under review, the sum of over ₦40 million Naira was expended on the two (2) programmes thereby enhancing the quality and coverage of the services being provided to citizens.

40. Under preventive health, I am glad to inform you that we have covered significant grounds in the area of public enlightenment/education on the virtues and necessity for personal and environmental hygiene. We similarly renewed our commitment and support on immunization to prevent childhood killer diseases. We have also redoubled our effort at raising the level of public awareness on the

Restricted

dangers of HIV/AIDS. Government will continue to explore ways to further sensitize the public to appreciate the dangers posed by deadly diseases/viruses such as Polio, HIV/Tuberculosis, malaria, etc. In addition, government is always prepared to work with other stakeholders to build a healthy society.

Water Supply:

41. Mr. Speaker, Honourable Members, one area that persistently attracts huge public concern and interest at all times is the issue of water supply, particularly in Kano metropolitan area. For many years our people have been grappling with water shortages in the State capital without an apparent end in site. So much has been expended in this sector by earlier governments in the quest to find a lasting solution to the problem. Indeed between January and September 2004, this government spent over ₦800 million on various undertakings in the sector. Similarly, in our rural areas we have approved the construction of motorized boreholes equipped with over-head tanks at a total cost of ₦219 million across the State. Our sole aim has been to provide potable water to our rural communities and to increase both the quality and quantity of the supply from our waterworks.

42. Yet, the problem of water shortage still persists, our huge expenditure notwithstanding. As a matter of fact, we have been sufficiently briefed by our experts that short of constructing additional waterworks, pipe borne water shortages in the state capital will not go away.

43. Mr. Speaker, Honourable Members, allow me state here that this administration understands and considers genuine the frustration of our people over the protracted water shortages. I therefore wish to reassure you of our commitment to find a solution to the problem. I have already indicated on the occasion of the Sallah festivities, the intention of the State Government to construct a new Water Treatment Plant to complement the existing ones. I will say more on this later.

Environmental Sanitation:

45. One of the areas that this administration has achieved tremendous improvement is the area of environmental sanitation, especially in the state capital.

46. It is satisfying to note that residents in Kano and its environs are already accustomed to a cleaner environment made possible by our administration. Once we are able to sustain our effort long enough for people to make the need for a clean environment a habit, we are confident to bequeath a cleaner and healthier environment.

47. As part of measures to consolidate these gains, government procured additional working materials, specialized machinery and other related implements. We have also recruited additional 500 cleaners to enable **REMASAB/the Ministry of Environment** cope with the challenges of cleaning and refuse disposal in the State.

Restricted

XVII

Rural Electrification:

48. As part of government initiative for rural development, we improved, and where relevant extended electricity services to rural dwellers. Within the financial year 2004, Government expended the sum of over ₦200 million on various undertakings in the sub-sector.

49. Within this period, it is gratifying to report that over 30 communities across the State were connected to the National Grid, while several others are enjoying improved services under our programme of providing transformers and other equipments necessary for improved supply.

Information and Culture:

50. Considering the pivotal role of the media at information dissemination and in particular advancing the course of democracy, we find it appropriate to make reasonable investment in the sector during the out-going Year 2004. Consequently, the sum of over ₦210 million was expended in providing two transmitters, other vital equipments and infrastructures to the State-owned media agencies namely Radio Kano AM and FM, the Triumph Publishing Company and CTV.

51. Various forms of support were similarly extended to the Kano Printing Press, History and Culture Bureau and the Ministry of Information headquarters. As a result of these interventions, we have achieved significant improvements in the quality of service delivery of these media outfits, particularly in the CTV and the Triumph Publishing Company, whose operations were erratic at various times in the past.

52. Consistent with our commitment and determination to Shari'ah implementation in all its facets, we deemed it appropriate to revitalize the operations of the State Films Censorship Board to enable it discharge its statutory responsibility of regulating the production and distribution of films, audio Cassettes and such other literatures. This is to ensure that these products are not in violation of the teachings of the Shari'ah. I am also happy to report that the Films Censorship Board has been revitalized, and its activities are being complemented by the specially constituted Mobile Court to try erring operators.

53. Mr. Speaker, Honourable Members, another significant accomplishment worthy of mention is the restoration of the individual's constitutional right of freedom of expression, association and freedom to hold opinion which, until very recently, was being trampled upon by the powers that be. Today, I am humbled to say that this administration will go down in history as one that is most tolerant of dissenting voices, accommodating the opposition and receptive to the advice, contributions or counseling by other citizens.

54. I am also pleased to recognize the constructive role played by the private media organisations in and outside the State for supporting our citizens to exercise their democratic rights at all times. In reiterating our readiness to continue to work with, and where necessary support these organisations to entrench a truly democratic culture in our State, I find it necessary to once again direct all the State-owned media organisations to open up and accommodate all shades of opinions.

Social Development:

55. The key objective of this administration, as you are all aware, is human development. Our goal is to promote basic human values; to empower our people to become self reliant; and to develop a sense of community in our people as a requisite of state building.

56. Mr. Speaker, Honourable Members, a lot of grounds has been covered in this endeavour. We have gone beyond sensitization, a necessary step, and are already addressing the issues of poverty, unemployment, women, youths and the re-orientation of the people. I have earlier highlighted to you the progress we have made in other human and material development initiatives in the areas of Shari'ah Implementation, Zakkah, societal re-orientation, mass food production and urban transportation.

57. However, in the area of youth empowerment, we have succeeded at creating employment opportunities for a large number of unemployed youth at federal, international and other private organizations through the State Guidance and Counseling Board. I am again pleased to report that Kano State has awoken from its slumber and is steadily pursuing the course of reclaiming its rightful place in creating opportunities for becoming self reliant.

58. In addition to the above, we have, through the activities of the offices of Special Adviser on the Activities of Non Governmental Organisations (NGOs) and Special Adviser Youth Development

commenced a programme of youth training for self employment. Already 2000 youths have been initiated into the program, following the three week camp organized for them in August this year.

59. Mr. Speaker, Honourable Members, successive governments have over the years, willingly or unwillingly maintained a suspicious separation between secular or Western Education and Islamic Education to the detriment of the overall interest of the society. We have since our assumption to office committed ourselves to reversing this unhealthy trend. Happily enough, we have in this year commenced a programme of systematic integration of these two forms of education beginning with the registration of Qur'anic/Islamiyya Schools and sensitization workshops for Qur'anic School Teachers and other stakeholders. Government has also provided hundreds of such institutions with basic requirements including working materials and infrastructure. Furthermore, government offered a variety of trainings, including computer training, to 1000 teachers and students. It is our sincere belief that by putting to use these newly acquired skills, they would greatly improve the image and the organization of such schools in addition to making their students/associates self reliant. Today I am happy to report to you that over 3000 Islamiyya/Qura'nic schools in the State have, in more than one way benefited from our varied programs of providing funding support, working materials, infrastructure and continuing education.

60. Kano's leading position in Islamic Education remains an enviable legacy which this administration cherishes, and which we will, In sha

Allah, strive to uphold. In keeping with this resolve, Government has extended various forms of support to the State Shari'ah Commission to further consolidate and sustain the legacy.

61. Seeing the accolades received by the Ramadan Feeding Programme pioneered last year by this administration, we considered it desirable to continue with the programme in the year 2004. Consequently, we expanded the scope over and above the previous year and served more than 20, 000 food packs daily. Praise be to Allah, for making it possible for us to distribute more than 600,000 food packs to the needy in the sacred month of Ramadan. This figure however, did not include the complementary daily distribution of 1,500 food packs by each of our 44 local governments. I must also acknowledge with a great deal of pride the giving of meals by private philanthropists motivated by the good response the government feeding programme received. Spurring philanthropy is exactly one of the desired objectives of government in leading the way and starting the Ramadan feeding programme and, indeed, similar social and charitable initiatives.

62. Likewise, in our desire to build a health/fitness conscious society, the State Government has in the year under review extended various forms of support totaling over N40 million to the sports sub-sector. It is thus gratifying to note that in response to this, the State has recorded remarkable successes in various sports endeavours. Our premier football club, the Kano Pillars, is among the four leading teams in the premier division. The outgoing year also registered remarkable improvement in schools sport; an area of activity that has been in the doldrums for many years.

THE YEAR 2005 BUDGET PROPOSAL

63. Mr. Speaker, Honourable Members the total proposed expenditure for the year 2005 is ₦41,691,274,140:00, made up of ₦22,056,065,832.00 or 53% recurrent expenditure, and ₦19,485,208,308.00 or 47% for capital works. The expenditure is expected to be financed from a total recurrent revenue of ₦35,161,423,982.00 and estimated capital receipts of ₦6,529,850,158.00.

64. Our revenue projection consists of total local revenue of ₦4.6 billion, federal statutory receipts of ₦30,513,273,982.00 and capital receipts of ₦6,529,850,158.00.

65. The proposed recurrent expenditure of ₦22.056billion comprise ₦5.2billion for Consolidated Revenue Fund Charges (CRFC), ₦8.25 billion personnel cost and ₦8.68 billion overhead cost. The capital expenditure component of ₦19.63billion is to be funded by ₦13.1billion expected surplus over recurrent expenditure and ₦6.5billion as Capital Receipts.

66. Mr. Speaker, Honourable Members, having laid the foundation for the implementation of policies and programs of the administration in the year 2004, we intend to commit our energy and resources to the pursuit of major projects and programs in 2005. Conscious of our pledge to be realistic in our projections, we are hereby proposing projects and expenditure plans that we believe are proportionate to the funds we expect to realize for the year 2005. Furthermore, I wish

to restate before you that in drawing our proposals we remained, as ever, guided by the belief in the centrality of our human resource and a passionate desire to develop our State and make it self reliant.

67. Having presented before you the structure and size of the year 2005 proposed budget, allow me to outline the projects and programmes we intend to pursue in the incoming financial year 2005.

Water Supply

68. Conscious of the legitimate yearnings and aspirations of our citizens for improved water supply, and in keeping with our pledge to decisively address the problem, we decided to accord priority to water supply in the 2005 fiscal year. Accordingly, we are proposing to spend the sum of ₦4, 302,600.00 on the take off of the construction of new water treatment plant and rehabilitation of the various water supply facilities in the State.

69. From this amount, the sum of ₦2 billion is earmarked for the take off of the proposed (100-150 million liter per day) new water treatment plant at Tumburawa, while another sum of ₦950 million is proposed to be spent on the reinforcement of trunk and reticulation and new distribution facilities. Similarly, in an effort to improve and sustain full capacity operation at existing Water Treatment Plants, the sum of ₦200 million is being proposed for 3rd Challawa Water Works, while another sum of ₦284 million is earmarked for procurement of water treatment chemicals.

70. As we prepare to launch our proposed new water treatment plant and other rehabilitation initiatives, I must use this opportunity to warn that constructing a new water treatment plant takes time and would not be completed within the year. I therefore wish to solicit for your understanding, support and prayers throughout the period of this major undertaking.

71. In our efforts to improve water supply in other parts of the State, the sum of ₦253 million is being proposed for variety of works at regional water supply schemes. These include Watari, Tiga, Rano, Kura, Tudun Wada, Gari-Kunchi, Kusalla, Tomas, Wudil and Joda-Gezawa. In the same token, another sum of ₦70 million is set aside for the extension of reticulation system to several towns and villages.

71. In addition, the sum of ₦180 million is earmarked for the construction of boreholes and rehabilitation of earth dams across the State. The provision should further complement the works already undertaken by the administration since inception as well as other similar efforts by Federal and local governments.

72. In line with our resolve to re-invigorate the operation of the State-owned water resources and construction agencies, the sum of ₦362 million is being proposed for rehabilitation and procurement of plants and equipments and such other vital working tools for Water Resources and Engineering Construction Agency (WRECA) and Rural Water Supply and Sanitation Agency (RUWASA). With the intervention, it is envisaged that the agencies will be properly

repositioned and equipped to face the current and future challenges in the water supply and water engineering needs of the State.

Agriculture

73. Mr. Speaker, Honourable Members, sufficient allocation was made to the agricultural sector in the year 2004 to facilitate the smooth take-off of our priority program of Mass Food Production. In consolidation of the remarkable gains made by the programme, the sum of ₦5.47 billion is proposed for the various undertakings in the year 2005.

74. From this allocation, the sum of ₦4 billion is again set aside for the production and procurement of assorted fertilizers for sale to farmers at subsidized rate. Similarly, the sum of ₦700 million is also proposed to cater for the next phase of the mass food production program. For this year 15,000 farmer groups will work with KNARDA as key partners of the mass food production program. This is an increase of 5000 farmer groups over 2004 figure of 10,000. In addition, 1,000 hectares of irrigation land is expected to be developed, while improved seeds, agro-chemicals, animal traction and other vital farm inputs and adaptable technologies will be provided to farmers.

75. Other activities of the sub-sector include the provision of ₦450 million state counterpart contribution on Joint Finance Projects with Local Government Councils for accelerated rural development. The sum of ₦50 million is proposed to augment the existing revolving fund for the purchase of grains for buffer stock. Considering the

contribution irrigated farming could make to our mass food production, the sum of ₦96million has been earmarked for the expansion of Gari, Tomas, Jakara as well as Fadama and other minor irrigation schemes. Furthermore, the sums of ₦30 million and ₦15million have been set aside for Tractor Hire Scheme and crop rehabilitation programmes respectively.

76. In other related undertakings, the sum of ₦97.23 million is being proposed for livestock development. The breakdown includes the sum of ₦29 million for the development of Cattle Ranches and Livestock Investigation and Breeding Centres, ₦15 million for Grazing Reserves, Cattle Dams and Fodder Conservation. Similarly the sum of ₦32.2 million is proposed for disease control and eradication scheme, poultry production and promotion of Bee Keeping.

77. For 2005 here are the targets set for our mass food production program: one, to increase crop production in the State by 100,000 metric tons through the provision of subsidized inputs to farmers and working with 15,000 farmer groups; two, to develop 1000 hectares of fadama land to boost irrigated farming and to create employment opportunity for 4,000 farmers in fadama areas; and, three, to provide livestock fattening packages to farmers to raise meat production in the State by 202 metric tones thereby enhancing the protein intake of the populace and at the same time increasing the income of the farmers.

Education

78a. The education sub-sector is one of the priorities of this administration since it assumed office. I have earlier presented to you an overview of our efforts at ameliorating some of its numerous problems in the 2004 fiscal year. Thus, in our determination to hold on to our commitment to rescue the sector from total collapse, the sum of ₦1.76 billion is to be committed to capital development of the sector in the year 2005.

78b. Projects planned from the amount include the sum of ₦600 million for improvement of existing secondary schools across the State, ₦165 million for the establishment of new secondary schools to ease the prevailing pressure on placement and admission of students, and another sum of ₦50 million for the relocation of some secondary schools that currently share premises with primary schools, or are on temporary sites. Among such secondary schools are GGJS Bichi, GGJS Gwarzo, GGJS Kawaji and GGJS Aisami. Others include JSS Lambu, JSS Shagogo, JSS Kwalli, GSCS Wudil, JSS Tangar, JSS Gaya and JSS Gandu. Mr. Speaker, not only are we providing additional space to accommodate the continually increasing number of our children transiting to secondary schools, we plan to provide one out of two secondary school students in the State with a desk and a chair during the year.

79. In our commitment to strengthen science, technical and vocational education in the State, the sum of ₦44.2million is proposed for works at Science, Technical and Vocational colleges under the Science and Technical Schools Board.

80. Similarly in our unwavering commitment to render necessary support towards the development of tertiary education in the State, the sum of ₦417million is proposed for capital works at Kano State University of Technology, Kano State Polytechnic, College of Education, College of Arts, Science and Remedial Studies, Audu Bako School of Agriculture, Aminu Kano School of Islamic Legal Studies and School of Environmental Studies Gwarzo. In the same token, the sum of ₦250 million is being earmarked for the State Scholarships Board for vital capital works and payment of students' allowances.

81. Considering the importance of primary education at setting the foundation for educational development, the sum of ₦250 million is being earmarked as State Government's contribution to capital development of the sub-sector for the year. We also intend to sustain the collaborative partnership with other stakeholders in the management of primary education to ensure that we raise the standard to meet the aspirations of our people.

82. Other undertakings in the sub-sector include a provision of ₦20 million for capital works at Teachers Service Board, ₦20 million for Kano State Library Board and ₦45 million to the Agency for Mass Education.

Commerce and Industry:

83. Mr. Speaker, Honourable members, the national economic outlook for the Year 2004, particularly as it relates to commerce and industry, is not encouraging.

84. At the State level, the decline in economic activity, especially manufacturing output, has stunted our growth and made it difficult for people to secure jobs.

85. This situation constitutes a cause for great concern to the Government.

86. Thus, in renewing our pledge and commitment to reclaim the State's position in commerce and industry, the sum of ₦210 million is proposed for various undertakings in the sector. From the amount, the sum of ₦120 million is earmarked to support the establishment of small and medium scale enterprises across the State. Furthermore, in our desire to provide our citizens access to investment capital, another sum of ₦22 million is proposed to finance rural industrialization loan and small scale industry credit schemes.

87. In the area of commerce and tourism, the sum of ₦60.5 million is proposed for tourism promotion and development, including re-development of Daula Hotel, and other capital works at Muhammadu Abubakar Rimi Market. Through these measures, Government hopes to rekindle public interest in trade, investment and industry, and at the same time attract outside investors to the State.

Urban & Regional Planning

88. The rapid expansion of Kano Metropolitan area vis-à-vis the attendant strain on utilities and infrastructure remains a major challenge for the Government. In our determination to respond to the challenge, the sum of ₦884.943 million is proposed for capital works in the upcoming financial year.

89. Out of this, construction and rehabilitation of roads within Kano metropolitan area has been allocated ₦600 million. The provision is for the completion of ongoing works at Tukuntawa Sharada Road, IBB Road, as well as completion and rehabilitation of 10Nos. roundabouts in Kano Metropolitan area. In the same vein, the reconstruction of Nassarawa Hospital Road and Alu Avenue, Dorayi Babba-Kabuga Bakin Bulu, Mubi-K/Nassarawa Road will take-off among others. It is also envisaged that the provision will cater for the commencement of new construction works at other vital road networks as well as the rehabilitation of several others including WTC-FCE Road and Zoo Road-Sheka Makaranta. Other works include rehabilitation of drainages and repair of various roads within the Kano metropolitan area.

Housing

90. The provision of shelter to citizens of the State at an affordable price is an important priority for this administration. Accordingly, the sum of ₦1,073billion is earmarked for housing development in the financial year 2005.

91. Among the undertakings covered by the provision is the take-off of Rural Housing Scheme under which a total of 528 low cost houses will be constructed and distributed equally among the 44 local governments of the State. The program will also include identification of other community based projects with African Development Foundation (ADF). Similarly, the provision will also cater for the Abuja Housing Units with the allocation of ₦100 million, construction of 110no. 2 and 3-Bed room housing units for owner-occupier scheme at Dangwauro and Mariri and 195 commercial housing units at Zawaciki, Dangwauro and Mariri sites with the allocation of ₦258.8 million.

92. As part of the Government's initiative on housing development, another sum of ₦390 million is also proposed for Site and Services Scheme. The amount will essentially be spent on basic infrastructure such as electricity, roads, water culvert and drainages at designated layouts, to spur orderly development.

Transport

93. The availability of good road network is essential for growth and sustainable economic development. Accordingly, the sum of ₦1.2billion is being set aside for the continuation and commencement of new road construction works in various parts of the State. These include the take-off and continuation of some roads: 42 kilometer Garko-Rano Road with the allocation of ₦50 million; Tsamiya Babba-Abasawa-Jogana-Kwanar Barde, ₦150 million; Dal-Masu-Gani-Gomo road, ₦200 million; Dungurawa-Tattarawa-Jalli Road ₦175million; and Dadinkowa-Kudaru road ₦80 million. Other works include, the completion of Armate Bridge

(N100 million) completion of Gezawa to State border road N190 million, and Kwanar Zira-Dugurawa Road N110million, as well as rehabilitation of various roads and bridges across the State N45 million.

94. Similarly, to ensure routine maintenance of existing roads and related infrastructure in the State, the sum of N10 million has been provided to continue with the rehabilitation of long abandoned machinery and equipment that was initiated by this Government. Already one gang of Road Works Machinery has been brought back to service as a result of our broken/abandoned machinery retrieval initiative. Government thus intends to accord special attention to routine maintenance of roads in this and subsequent years, to minimize the heavy burden of reconstruction and the attendant risks associated with dilapidated roads.

95. Again, as part of our continuing effort to address the problem of commuter transportation in the State capital, the sum of N50 million is proposed for general improvement of urban transit. In addition to the usual city buses, we are currently expecting delivery of 500 tricycles, and are confident to receive and perhaps put some of them on the road before the end of the year. Both the tricycles and commuter vehicles will be operated by interested members of the public under various loan/lease arrangements that will guarantee our investment and at the same time ensure that the vehicles are strictly used for easing transit in the State capital.

Health

96. One of the key areas that attracted our immediate attention right from the inception of this administration was the deplorable condition of our health sector. Since then, we committed enormous resources to rehabilitate, and where necessary, expand infrastructure and the professional manpower base. In continuation of these efforts, the sum of ₦360 million is being set aside in the Year 2005 for capital works.

97. This amount includes a provision of ₦75 million for improvement and renovation works at Murtala Muhammad Specialist Hospital (MMSH), ₦50 million for the upgrading of Primary Health Centers and Cottage Hospitals and the sum of ₦33 million for upgrading a number of Cottage Hospitals to General Hospitals. The affected health institutions are Waziri Shehu Gidado Hospital and those at Minjibir, Rogo, Dawakin Tofa, Kiru and Shanono. Others, include, Takai, Garko, Tsanyawa, Durbunde, Kibiya and Riruwai.

98. To further consolidate the gains arising from our interventions in the sector, the sum of ₦165 million is earmarked for maintenance of existing hospitals, procurement of additional specialized medical equipment, primary healthcare and disease control (including immunization) and improvement of secondary healthcare services. Government also intends to revitalize and expand its activities in the area of supply of essential drugs through the State Drug Manufacturing Agency, and pursue a systematic but sustained public enlightenment on the dangers of HIV/AIDS.

Rural & Community Development

99. In fostering the human development initiative of the Administration, we shall continue to accord priority to rural development. Accordingly the sum of ₱350 million is being proposed for rural electrification and other community development related activities. The amount covers the provision of ₱200 million for the extension of electricity supply to towns and villages along the National Grid, and procurement of specialized equipment.

100. For community-development sub-sector, the sum of ₱150 million is earmarked for various capital development works. These include a provision of ₱104 million for support to the development of Town/Community Hall (Zauren Shawara) across the State. Model Village scheme has a provision of ₱30 million and another sum of ₱16 million for the rehabilitation of Gama Vocational Training Center, and grants/assistance to community development projects.

Environment

101. As an area of activity that has direct bearing on our collective health and well being, fostering a clean environment continues to be an important area of this administration. Accordingly, and in line with our resolve to improve on the gains recorded since we assumed office, an allocation of ₱638 million is proposed for various capital works in the sub-sector.

102. From the provision, the sum of ₱200 million is for projects under the flood and ecological disaster control in the State, ₱88 million for

urban waste management and procurement of specialized equipment, while ₦20 million will be expended on rehabilitation and maintenance of sewage treatment plants.

103. In our bid to improve drainage network in the State to minimize the incidence of flood and other attendant health hazards posed by poor drainage, the sum of ₦105 million is proposed for various works in the sub-sector. These include the sum of ₦25 million for the construction of drainages at Getsi Stream, Sauna-Kawaji and Rimin Kebe, and another ₦20 million for the maintenance and clearance of drainages in Kano metropolitan area and construction of drainages in other urban centers. Other works envisioned under the provision include the Channelization and re-alignment of Jakara Stream and Graveyard erosion control.

104. Mr. Speaker, Honourable Members, another important challenge before us today is the threat posed to our environment by desertification. Regrettably, while there is general consensus on the enormity of the danger, there seems to be no corresponding will to decisively confront it.

105. While we appreciate the fact that the problem before us requires collaborative efforts by local, the state and the federal governments on the one hand and donor agencies on the other, we believe that the State Government, however, bears a heavier burden of responsibility to initiate measures to retard, and ultimately repel the menace. Accordingly, we voted for ₦147 million to continue with our effort at

addressing issues of the forestry sub-sector. The amount includes ₦91.1 million for National Forestry Development programme, development of nurseries, Gum Arabic Plantation, Bio diversity conservation, woodlots and promotion of fuel. It is also proposed that another sum of ₦46 million will be expended by Kano Afforestation Project on afforestation and desert control programmes.

Social Development, Youths & Sports:

106. Honourable members, the social sector represents an important aspect of our human development programme through which we seek to engender positive transformation of our society. Accordingly, an allocation of ₦515 million is proposed for the various capital works in the sector. Out of this figure the sum of ₦70 million is dedicated to capital works at Shari'ah and Zakkah Commissions and Hisbah Board. Similarly, the sum of ₦150 million is set aside for numerous awareness campaigns and initiatives on Societal Re-orientation, a focal point for our administration.

107. Considering the special position of children and the disabled under Shari'ah, Government has proposed ₦40 million under the capital budget for projects and programmes aimed at promoting their interests. This is in addition to other initiatives targeted toward their welfare and development in other sections of the budget.

108. Mr. Speaker, in our desire to ensure that our State is not left behind in understanding our electronically wired world; in our commitment to build a truly cooperative and patriotic community; and in

our determination to find a lasting solution to the scourge of youth unemployment, another sum of ₦414 million is proposed for programs promoting Information Technology, Non-Governmental Organisations Activities, Youth Development and sports.

Information and Culture:

109. In our time, a free and vibrant press is considered a sign of genuine democracy. That is the reason why we decided right from our inception to liberalize the State-owned media. Indeed, it is to restore public confidence in Government that we allowed private media houses to operate without hindrance or intimidation, Alhamdu lillah, people from far and near were time and again testifying that our administration has made possible a free and enabling working environment for the media. Our idea is to serve the people who have given us their mandate, and this can only continually improve if we allow them a lot of free space to air their views.

110. In continuation with the reform process of State-owned media services, the sum of ₦208 million is being earmarked for capital works in the Year 2005. From the amount the sum of ₦120 million is set aside for works at Radio Kano, Triumph Publishing Company, Government Printing Press and the Ministry of Information. With these additional interventions in the sector, Government hopes to improve the quality of service offered by State media organisations in such a way that they can compete with their peers elsewhere and also with the private media.

111. On safeguarding the cherished values of our society, Government will strive to ensure the sanctity of our religion and to protect our youth against corruption by foreign cultures and way of life. Accordingly, the sum of ₦83 million is proposed for capital works by State Films Censorship Board and the State History and Culture Bureau.

General Administration:

112. Mr. Speaker, Honourable Members, as we transit from 'foundation' laying to take giant strides, Government is faced with new challenges and additional obligations. Accordingly, an expenditure of ₦2.03 billion is proposed to cater for the challenges and obligations in the upcoming year.

113. Out of this figure, the sum of ₦450 million is proposed under the Special Projects vote. Similarly, the sum of ₦250 million is provided for Capital Commitment.

114. The scope and exigencies of Government activities entail very many and diverse undertakings such as the provision of office equipment, furniture and machinery for various agencies, including the Judicial and Legislative arms of Government. Accordingly the sum of ₦500 million is voted for such commitment in the year 2005.

115. Other major areas covered by the provision in the General Administration sector include, the sum of ₦100 million for commencement of the construction of Block 4 and rehabilitation of

existing Blocks at Audu Bako Secretariat, purchase of FHA Houses at Gwarinpa, Abuja, ₦80 million; construction of Comprehensive State Islamic Center, ₦50 million and furnishing of House of Assembly (Annex) building, ₦20 million. It is also envisaged that the sum of ₦50 million will be expended on the construction of new Shari'ah Courts at designated locations in the State and another ₦20 million on the construction of a secretariat for the Judicial Service Commission.

Implementation of the Year 2005 Budget

116. Mr. Speaker, Honourable Members, on the occasion of the presentation of the Year 2004 Budget, we set upon ourselves the task to closely monitor the process of implementation of the Budget to ensure value for money for our people. It is gratifying to report that we have, together with this august Assembly, set a new pace in the process of governance in recent times.

117. As I present the proposals for the 'Economic Development and Empowerment Budget' for your consideration, I once again find it relevant to reiterate our resolve and commitment to significantly improve on our performance at monitoring the implementation of Budget and any other trust devolved upon us or other agents of Government. We shall never relent in our effort to bequeath a legacy of trust in Public Service.

Transparency and Accountability

118. During a similar event last year, I recall my pledge to lead a transparent administration whose members are conscious of their

obligations either as individuals or collectively as a team at all times. Since that maiden pledge, I am happy to state that we have not faltered in any way, nor abandoned the commitment to uphold public trust.

119. During the period since we assumed office, our resolve in this direction has been put to test in a variety of ways, particularly in the aftermath of our sincere effort on fertilizer procurement. We thank Allah, the Almighty that despite our shortcomings as mortal beings, we have been vindicated by independent umpires.

120. Thus while we do not pride ourselves over the development, I find it significantly relevant to admonish those who drive pleasure in wanton abuse of public trust to change their ways and to join and cooperate with us in the pursuit of all that is for the public good. This is the only way we can build a new and proud Kano State where everyone is conscious of his/her responsibilities to the Creator, Allah, to family and to the community.

121. As we prepare to implement the proposal before you, I once again find it necessary to advise all public officers to tread the path of transparency and accountability so as to absolve ourselves of any blame for inaction or abuse of trust by the people, and most importantly on the Day of Reckoning, the Day of Judgment. In the meantime, may I intimate this august Assembly that as part of our continuing effort to engender accountability and transparency in the Civil Service, Government had since revised all relevant instruments on due process

such as Financial Instructions, Stores Regulations, Civil Service Rules and Scheme of Service. These are being deployed to reinforce other efforts aimed at promoting transparency and accountability.

Peace and Tranquility

122. Mr. Speaker, Honourable Members, societal peace and tranquility is the cornerstone for the growth and sustenance of democracy and indeed the overall prosperity of any society. Thus, we shall vigorously continue to make every effort to engender peace and harmonious co-existence amongst the citizens of the State.

123. In concluding this presentation, permit me to remark that for us to translate our vision for a community-based, strong, united and prosperous society to reality, we must all make sacrifices and continually strive to imbibe the true meaning of Shari'ah which entails discourse, dialogue, and consensus in resolving issues. It also calls for patience, perseverance, tolerance and understanding of other people's views.

124. On this occasion therefore, I find it again necessary to express special gratitude to all those who through their constructive criticisms and advice made us aware of our shortcomings and at times supplied part of the wisdom required to discharge our responsibilities. I recognize, particularly, the patriotic role of some members of the opposition who, motivated by a strong sense of public purpose, acted responsibly and offered constructive criticism of our stewardship. I say to all such respectable men and women that we shall always listen

and oblige any advice so long as it is for the public good. I also wish to reach out and implore, from this podium, the few who resorted to unconventional and undignified ways of opposition, to abandon such course and join the path of civility.

125. Finally Mr. Speaker, in presenting to you the Proposed Year 2005 Budget of Kano State Government, - the Budget of Economic Development and Empowerment, may I appeal to your sense of patriotism and devotion to duty and request you to consider and accord speedy approval to this modest proposal so that the people can be timely served.

Wassalamu Alaikum wa RahmatuLah.

KANO STATE ESTIMATES, 2005
FINANCIAL STATEMENT: CONSOLIDATED REVENUE FUND

| | 2004 Approved Estimates =N= | 2005 Approved Estimates =N= |
|---|--------------------------------------|--------------------------------------|
| A ESTIMATED RECURRENT REVENUE | | |
| 1 Total Local Revenue | 6,765,082,078 | 6,148,150,000 |

| 101 | Integrated Agricultural and Rural Development (KNARDA) | On-going | 175,232,000 | 889,633,000 | 975,575,220 | <p>This is an on-going state wide programme covering about 840,000 farming families with a cultivated land of 1.7 m ha. It envisages stimulating growth in agricultural production, increase farmers income and alleviate poverty among our teaming population. The programme is being implemented through organised groups of agricultural producers and will consist of the following sub - programmes:-</p> <p><u>a. Establishment of Management Training Plots.</u> This programme aims at development of improved agricultural production technologies to be passed/disseminated to the farmers as organized groups of producers. The groups will be provided with technical support and inputs (seeds, fertilizers, agrochemicals) required to cultivate a total of 25,000 ha during both wet and dry seasons involving grain, tuber and vegetable crops. KNARDA will source and validate new improved agricultural technologies for adaption to our farming environment before being disseminated to farmers. Improved seeds will also be sourced, multiplied and processed for use by our teaming farmers in the State. Other components of the subprogramme include support to media and Women groups in small scale agricultural programmes, livestock fattening scheme and buy back of 30% of the total output of grains from the participating farmers.</p> |
