Introduction

In line with the adoption of the International Public sector Accounting Standards (IPSAS) in Nigeria, a Standardized Chart of Account (COA) alongside a set of General Purpose Financial Statements (GPFS) was designed and adopted by the State Government of Osun effective January 2016. The Standardized COA and GPFS became necessary to ensure uniformity in public sector accounting reporting in Nigeria which is a fundamental prerequisite towards the adoption of IPSAS Accrual.

Therefore, in order to ensure an effective and efficient utilization of the COA and GPFS, Accounting Policies have been developed by the State Government as a set of guidelines to direct the Processes and Procedures relating to financial reporting in the State Government's Financial Statements.

8.1 Non-Exchange Transactions – IPSAS 23

- Public Entity recognizes revenues from non-exchange transactions such as fees, taxes and fines when any of the events occur and the recognition criteria are met.
- Other non-exchange revenues are recognized when it is probable that the future economic benefits or service potential associated with the asset will flow to the Entity and the fair value of the asset can be measured reliably.

8.2. Exchange Transactions – IPSAS 9

Revenues comprise the fair value of the consideration received or receivable for the sale of goods and services in the ordinary course of PSEs/MDAs' activities. Revenue is shown net of tax, returns, rebates and discounts.

9. Sale of Goods

Revenue from the sale of goods is recognized when the significant risks and rewards of ownership has been transferred to the buyer, usually when goods are delivered and the amount of revenue can be measured reliably and it is probable that the economic benefits or service potential associated with the transaction will flow to the entity.

10. Rendering of services

- Revenue for rendering of services is recognized based on the stage of completion when the outcome of the transaction can be estimated reliably.
- When the contract outcome cannot be measured reliably, revenue is recognized only to the extent that the expenses incurred are recoverable.

11. Interest Income

Interest income is accrued using the effective yield method. The effective yield discounts estimated future cash receipts through the expected life of the financial asset to that asset's net carrying amount. The method applies this yield to the principal outstanding to determine interest income each period.

12. Dividends

Dividends or similar distributions must be recognized when the government's right to receive income is established.

Revenues from non-exchange transactions with other government entities are measured at fair value and recognized on receipt of the asset (cash, goods, services and property) if it is free from conditions and it is probable that the economic benefits or service potential related to the asset will flow to the entity and can be measured.

20. Employee Benefits/Pension Obligations – IPSAS 25

20.1 Under the Defined Benefits Scheme:

- a. Provision shall be made, where applicable, using an actuarial valuation for retirement gratuities. The actuarial valuation determines the extent of anticipated entitlements payable under employment contracts and brings to account a liability using the present value measurement basis, which discounts expected future cash outflows.

- a. Cash & Cash Equivalent shall be reported under Current Assets in the statement of financial position.

qualifying asset shall be capitalized and included in the cost of that asset.

- f. A qualifying asset is an asset that necessarily takes a substantial period of time to get ready for its intended use or sale.
- g. All other borrowing costs shall be recognized as an expense in the period in which they are incurred.
- h. Recognition of liabilities falling due for the year
A minimum of 2% to 5% provision is made on all loans including inherited loan prior to the adoption of IPSAS in year 2016 as the current portion that will be redeemable in the coming year.

46. Transfers to Other Government Entities

Transfers to other government entities are non-exchange items and shall be recognized as expenses in the statement of financial performance.

47. Service Concession Arrangement – IPSAS 32

47.1 Service Concession Arrangement Assets

- a. Service Concession Assets are operated by third parties under the terms of service Concession Arrangement. On classification, the original service concession asset shall be measured at its fair value and any difference between its fair value and its book value shall be recognized in the Statement of Financial Performance.
- b. Since the fair value of assets previously transferred under Service Concession Arrangements is not reliably available, Government has chosen to adopt the standard retrospectively from 1st January 2016.
- c. If the terms of the arrangement require Government to compensate the operator for the concession asset by making payments and the payments are separable between the asset and service portions of the payment, then the fair value of the original service concession asset is the fair value of the asset portion of the payments. If however the asset and service portions of the payments are not separable, the fair value shall be determined using estimation techniques.

47.2 Service Concession Arrangement Liabilities

- a. When Government recognizes a Service Concession Arrangement asset, it shall also recognize a liability of an equal amount.
- b. The liability shall be split between a financial liability and a performance obligation.
- c. The financial liability shall arise from the payments due from an entity under the terms of the Service Concession Arrangement and the performance obligation from the rights granted to the operator under the terms of the Service Concession Arrangement to earn revenues from the Service Concession Asset(s) or associated asset(s).

48. Losses through Criminal Conduct

Losses through criminal conduct, and any amounts recovered, are disclosed separately.

- c. The State determined the classification of its Current and Non-Current Liabilities at the IPSAS First Adoption in 2016. After initial recognition, Interest Bearing Loans and Borrowings are subsequently measured at amortized cost using the effective interest method. Upon classification of facility as current portion of long term facility, interest previously accrued and not paid are reversed from the Revenue Account and Debited into the Interest Suspense Account. Future interest received on the account is debited to the same account until such facilities become performing.
